Source: Urban-Brookings Tax Policy Center Microsimulation Model (version 0516-2).
Number of AMT Taxpayers (millions). Baseline: $5.5 \quad$ Proposal: 5.5

* Non-zero value rounded to zero; ** Insufficient data
(1) Calendar year. Baseline is current law. Proposal would repeal the 3.8 percent tax on net investment income of individual with incomes exceeding $\$ 200,000$ and couples with
incomes exceeding $\$ 250,000$. For a description of TPC's current law baseline,
http://www.taxpolicycenter.org/taxtopics/Baseline-Definitions.cfm
(2) Includes both filing and non-filing units but excludes those that are dependents of other tax units. Tax units with negative adjusted gross income are excluded from their respective income class but are included in the totals. For a description of expanded cash income, see
http://www.taxpolicycenter.org/TaxModel/income.cfm
(3) The income percentile classes used in this table are based on the income distribution for the entire population and contain an equal number of people, not tax units. The breaks are (in 2016 dollars):
$20 \%$ \$26,900; $40 \%$ \$52,300; 60\% \$89,300; 80\% \$149,900; 90\% \$219,700; 95\% \$299,500; 99\% \$774,300; 99.9\% \$4,760,500.
(4) Includes tax units with a change in federal tax burden of $\$ 10$ or more in absolute value.
(5) After-tax income is expanded cash income less: individual income tax net of refundable credits; corporate income tax; payroll taxes (Social Security and Medicare); estate tax; and excise taxes.
(6) Average federal tax (includes individual and corporate income tax, payroll taxes for Social Security and Medicare, the estate tax, and excise taxes) as a percentage of average expanded cash income.

Source: Urban-Brookings Tax Policy Center Microsimulation Model (version 0516-2),

* Non-zero value rounded to zero; ** Insufficient data
(1) Calendar year. Baseline is current law. Proposal would repeal the 3.8 percent tax on net investment income of individual with incomes exceeding $\$ 200,000$ and couples with
incomes exceeding $\$ 250,000$. For a description of TPC's current law baseline,
http://www.taxpolicycenter.org/taxtopics/Baseline-Definitions.cfm
(2) Includes both filing and non-filing units but excludes those that are dependents of other tax units. Tax units with negative adjusted gross income are excluded from their respective income class but are included in the totals. For a description of expanded cash income, see
http://www.taxpolicycenter.org/TaxModel/income.cfm
(3) The income percentile classes used in this table are based on the income distribution for the entire population and contain an equal number of people, not tax units. The incomes used are adjusted for family size by dividing by the square root of the number of people in the tax unit. The resulting percentile breaks are (in 2016 dollars): $20 \% \$ 19,400 ; 40 \% ~ \$ 35,200 ; 60 \% \$ 58,200 ; 80 \% \$ 92,800 ; 90 \% \$ 131,400 ; 95 \% \$ 180,400$; $99 \%$ \$450,000; 99.9\% \$2,646,600.
(4) Includes tax units with a change in federal tax burden of $\$ 10$ or more in absolute value
(5) After-tax income is expanded cash income less: individual income tax net of refundable credits; corporate income tax; payroll taxes (Social Security and Medicare); estate tax; and excise taxes.
(6) Average federal tax (includes individual and corporate income tax, payroll taxes for Social Security and Medicare, the estate tax, and excise taxes) as a percentage of average expanded cash income.

Source: Urban-Brookings Tax Policy Center Microsimulation Model (version 0516-2)
Non-zero value rounded to zero; ** Insufficient data
ote: Elderly tax units are those with either head or spouse (if filing jointly) age 65 or older.

1) Calendar year. Baseline is current law. Proposal would repeal the 3.8 percent tax on net investment income of individual with incomes exceeding $\$ 200,000$ and couples with
hcomes exceeding $\$ 250,000$. For a description of TPC's current law baseline
(2) Includes both filing and non-filing units but excludes those that are dependents of other tax units. Tax units with negative adjusted gross income are excluded from their respective income class but are included in the totals. For a description of expanded cash income, see
he totals. For a description of expanded cash income, se
(3) The income percentile classes used in this table are based on the income distribution for the entire population and contain an equal number of people, not tax units. The incomes used are adjusted for family size dividing by the square root of the number of people in the tax unit. The resulting percentile breaks are (in 2016 dollars): $20 \% \$ 19,400 ; 40 \% ~ \$ 35,200 ; 60 \% ~ \$ 58,200 ; 80 \% ~ \$ 92,800 ; 90 \% \$ 131,400 ; 95 \% \$ 180,400 ; 99 \%$ 450,000; 99.9\% \$2,646,600.
2) Includes tax units with a change in federal tax burden of $\$ 10$ or more in absolute value.
(5) After-tax income is expanded cash income less: individual income tax net of refundable credits; corporate income tax; payroll taxes (Social Security and Medicare); estate tax; and excise taxes.
(6) Average federal tax (includes individual and corporate income tax, payroll taxes for Social Security and Medicare, the estate tax, and excise taxes) as a percentage of average expanded cash income.
