Number of AMT Taxpayers (millions). Baseline: 5.2

Proposal: 5.2

* Non-zero value rounded to zero; ** Insufficient data

(1) Calendar year. Baseline is current law. The proposal would (a) make the Child and Dependent Care Credit refundable and (b) increase maximum allowable expenses to \$6,000 per child under age 3. Maximum allowable expenses would continue to be \$3,000 for dependents over age 6. We assume that 80 percent of tax units with childcare expenses in the baseline who receive a benefit under a refundable CDCTC, but not under current law would claim that benefit and that that percentage would increase by 1 percentage point in subsequent years up to a maximum of 90 percent.

<http://www.taxpolicycenter.org/taxtopics/Baseline-Definitions.cfm>

(2) Includes both filing and non-filing units but excludes those that are dependents of other tax units. Tax units with negative adjusted gross income are excluded from their respective income class but are included in the totals. For a description of expanded cash income, see

<http://www.taxpolicycenter.org/TaxModel/income.cfm>

(3) Includes tax units with a change in federal tax burden of \$10 or more in absolute value.

(4) After-tax income is expanded cash income less: individual income tax net of refundable credits; corporate income tax; payroll taxes (Social Security and Medicare); estate taxes; and excise taxes.

(5) Average federal tax (includes individual and corporate income tax, payroll taxes for Social Security and Medicare, the estate tax, and excise taxes) as a percentage of average expanded cash income.

* Non-zero value rounded to zero; ** Insufficient data

(1) Calendar year. Baseline is current law. The proposal would (a) make the Child and Dependent Care Credit refundable and (b) increase maximum allowable expenses to \$6,000 per child under age 3. Maximum allowable expenses would continue to be \$3,000 for dependents over age 6. We assume that 80 percent of tax units with childcare expenses in the baseline who receive a benefit under a refundable CDCTC, but not under current law would claim that benefit and that that percentage would increase by 1 percentage point in subsequent years up to a maximum of 90 percent.
<http://www.taxpolicycenter.org/taxtopics/Baseline-Definitions.cfm>

(2) Includes both filing and non-filing units but excludes those that are dependents of other tax units. Tax units with negative adjusted gross income are excluded from their respective income class but are included in the totals. For a description of expanded cash income, see
<http://www.taxpolicycenter.org/TaxModel/income.cfm>

(3) Includes tax units with a change in federal tax burden of \$10 or more in absolute value.

(4) After-tax income is expanded cash income less: individual income tax net of refundable credits; corporate income tax; payroll taxes (Social Security and Medicare); estate tax; and excise taxes.

(5) Average federal tax (includes individual and corporate income tax, payroll taxes for Social Security and Medicare, the estate tax, and excise taxes) as a percentage of average expanded cash income.
