Source: Urban-Brookings Tax Policy Center Microsimulation Model (version 0509-1).

Number of AMT Taxpayers (millions). Baseline: 18.2

Proposal: 17.8

(1) Calendar year. Baseline is current law. Proposal would increase regular income tax liability before credits by the value of itemized deductions, net of any Pease limitation, multiplied by the difference, if positive, between the taxpayer's statutory marginal rate and 28 percent. For AMT purposes, AMT liability, if positive, would be increased by the value of itemized deductions excluding those for state and local taxes, medical expenses, and miscellaneous deductions subject to the 2 percent of AGI floor multiplied by the difference, if positive, between the taxpayer's statutory marginal rate and 28 percent.

(2) Tax units with negative cash income are excluded from the lowest income class but are included in the totals. For a description of cash income, see http://www.taxpolicycenter.org/TaxModel/income.cfm

(3) Includes both filing and non-filing units but excludes those that are dependents of other tax units.

(4) After-tax income is cash income less: individual income tax net of refundable credits; corporate income tax; payroll taxes (Social Security and Medicare); and estate tax.

(1) Calendar year. Baseline is current law. Proposal would increase regular income tax liability before credits by the value of itemized deductions, net of any Pease limitation, multiplied by the difference, if positive, between the taxpayer's statutory marginal rate and 28 percent. For AMT purposes, AMT liability, if positive, would be increased by the value of itemized deductions excluding those for state and local taxes, medical expenses, and miscellaneous deductions subject to the 2 percent of AGI floor multiplied by the difference, if positive, between the taxpayer's statutory marginal rate and 28 percent.

(2) Tax units with negative cash income are excluded from the lowest income class but are included in the totals. For a description of cash income, see

http://www.taxpolicycenter.org/TaxModel/income.cfm

(3) Includes both filing and non-filing units but excludes those that are dependents of other tax units.

(4) After-tax income is cash income less: individual income tax net of refundable credits; corporate income tax; payroll taxes (Social Security and Medicare); and estate tax.
