Source: Urban-Brookings Tax Policy Center Microsimulation Model (version 0509-4).

Number of AMT Taxpayers (millions). Baseline: 16.6

Proposal: 16.8

(1) Calendar year. Baseline is current law plus the following EGTRRA extensions: increase the maximum credit rate to 35 percent; increase the eligible expenses to \$3,000 for one child and \$6,000 for two or more children; increase the start of the credit rate phasedown to \$15,000 of AGI (not indexed for inflation); and allow the credit regardless of tentative AMT. Proposal would increase the threshold at which the credit rate begins to phase down from \$15,000 to \$85,000. Proposal would also make the CDCTC fully refundable regardless of income tax liability. Estimates assume a 90-percent participation rate for newly-eligible tax units.
(2) Tax units with negative cash income are excluded from the lowest income class but are included in the totals. For a description of cash income, see

http://www.taxpolicycenter.org/TaxModel/income.cfm

(3) Includes both filing and non-filing units but excludes those that are dependents of other tax units.

(4) After-tax income is cash income less: individual income tax net of refundable credits; corporate income tax; payroll taxes (Social Security and Medicare); and estate tax.

(1) Calendar year. Baseline is current law plus the following EGTRRA extensions: increase the maximum credit rate to 35 percent; increase the eligible expenses to \$3,000 for one child and \$6,000 for two or more children; increase the start of the credit rate phasedown to \$15,000 of AGI (not indexed for inflation); and allow the credit regardless of tentative AMT. Proposal would increase the threshold at which the credit rate begins to phase down from \$15,000 to \$85,000. Proposal would also make the CDCTC fully refundable regardless of income tax liability. Estimates assume a 90-percent participation rate for newly-eligible tax units.
 (2) Tax units with negative cash income are excluded from the lowest income class but are included in the totals. For a description of cash income, see

http://www.taxpolicycenter.org/TaxModel/income.cfm

(3) Includes both filing and non-filing units but excludes those that are dependents of other tax units.

(4) After-tax income is cash income less: individual income tax net of refundable credits; corporate income tax; payroll taxes (Social Security and Medicare); and estate tax.
