(1) Calendar year. Effective marginal tax rates are weighted by the appropriate income source. Baseline is current policy. Proposal would raise the top regular individual income tax rate by one percentage point to 36 percent. For a description of TPC's current policy baseline, see:

<http://taxpolicycenter.org/numbers/displayatab.cfm?Docid=3131>

(2) Includes both filing and non-filing units but excludes those that are dependents of other tax units. Tax units with negative cash income are excluded from the lowest income class but are included in the totals. For a description of cash income, see

<http://www.taxpolicycenter.org/TaxModel/income.cfm>

(3) Adjusted gross income (AGI) values shown are for married couples filing a joint return (MFJ); the thresholds for single tax units are 80 percent of the MFJ amounts and the thresholds for heads of household are 90 percent of the MFJ amounts. The AGI thresholds are expressed in 2009 dollars.
