Source: Urban-Brookings Tax Policy Center Microsimulation Model (version 0516-2).

Number of AMT Taxpayers (millions). Baseline: 5.5

Proposal: 5.5

* Non-zero value rounded to zero; ** Insufficient data

(1) Calendar year. Baseline is current law. Proposal would repeal all ACA taxes: the 3.8 percent Net Invest Income Tax, the 0.9 additional HI tax, the Cadillac Tax, the excise tax on employers offering inadequate health insurance coverage, the excise tax on individuals without adequate health insurance, the increase in threshold for medical expense deductions, and the excise taxes on health insurance providers, pharmaceutical manufacturers and importers, and medical device manufacturers and importers. Analysis does not include the Premium Tax Credit which is not treated as a tax in the TPC baseline due to its similarity to a spending program. For a description of TPC's current law baseline, <http://www.taxpolicycenter.org/taxtopics/Baseline-Definitions.cfm>

(2) Includes both filing and non-filing units but excludes those that are dependents of other tax units. Tax units with negative adjusted gross income are excluded from their respective income class but are included in the totals. For a description of expanded cash income, see <http://www.taxpolicycenter.org/TaxModel/income.cfm>

(3) Includes tax units with a change in federal tax burden of \$10 or more in absolute value.

(4) After-tax income is expanded cash income less: individual income tax net of refundable credits; corporate income tax; payroll taxes (Social Security and Medicare); estate taxes; and excise taxes.

(5) Average federal tax (includes individual and corporate income tax, payroll taxes for Social Security and Medicare, the estate tax, and excise taxes) as a percentage of average expanded cash income.

* Non-zero value rounded to zero; ** Insufficient data

(1) Calendar year. Baseline is current law. Proposal would repeal all ACA taxes: the 3.8 percent Net Invest Income Tax, the 0.9 additional HI tax, the Cadillac Tax, the excise tax on employers offering inadequate health insurance coverage, the excise tax on individuals without adequate health insurance, the increase in threshold for medical expense deductions, and the excise taxes on health insurance providers, pharmaceutical manufacturers and importers, and medical device manufacturers and importers. Analysis does not include the Premium Tax Credit which is not treated as a tax in the TPC baseline due to its similarity to a spending program. For a description of TPC's current law baseline, <http://www.taxpolicycenter.org/taxtopics/Baseline-Definitions.cfm>

(2) Includes both filing and non-filing units but excludes those that are dependents of other tax units. Tax units with negative adjusted gross income are excluded from their respective income class but are included in the totals. For a description of expanded cash income, see <http://www.taxpolicycenter.org/TaxModel/income.cfm>

(3) Includes tax units with a change in federal tax burden of \$10 or more in absolute value.

(4) After-tax income is expanded cash income less: individual income tax net of refundable credits; corporate income tax; payroll taxes (Social Security and Medicare); estate tax; and excise taxes.

(5) Average federal tax (includes individual and corporate income tax, payroll taxes for Social Security and Medicare, the estate tax, and excise taxes) as a percentage of average expanded cash income.
