(1) Calendar year. Estimates exclude those that are dependents of other tax units.

(2) Tax units with negative adjusted gross income are excluded from their respective income class but are included in the totals. For a description of expanded cash income, see <http://www.taxpolicycenter.org/TaxModel/income.cfm>.

(3) The income percentile classes used in this table are based on the income distribution for the entire population and contain an equal number of people, not tax units. The breaks are (in 2016 dollars): 20% \$24,800; 40% \$48,400; 60% \$83,300; 80% \$143,100; 90% \$208,800; 95% \$292,100; 99% \$699,000; 99.9% \$3,749,600.

(4) Repeal the ACA's excise taxes on pharmaceutical manufacturers and importers.

(5) TPC does not include the Premium Tax Credit in its tax baseline due to its similarity to a spending program.
