Number of AMT Taxpayers (millions). Baseline: 5.2

Proposal: 6

\* Non-zero value rounded to zero; \*\* Insufficient data

(1) Calendar year. Table shows the tax benefits. Baseline is current law. Proposal would (a) repeal the tax deferral of contributions to IRAs, Keogh accounts, defined contribution plan and defined benefit retirement plans; (b) repeal the saver's credit; (c) repeal exemption of income accrued within these retirement savings accounts; and (d) repeal tax on pension income, withdrawals from retirement savings accounts, as well as the early withdrawal penalty. Only impacts of these repeals in the current year are accounted for, which differs from standard TPC tables where tax benefits of retirement savings incentives are calculated on a present value basis. For a description of TPC's current law baseline, see <http://www.taxpolicycenter.org/taxtopics/Baseline-Definitions.cfm>

(2) Includes both filing and non-filing units but excludes those that are dependents of other tax units. Tax units with negative adjusted gross income are excluded from their respective income class but are included in the totals. For a description of expanded cash income, see <http://www.taxpolicycenter.org/TaxModel/income.cfm>

(3) The income percentile classes used in this table are based on the income distribution for the entire population and contain an equal number of people, not tax units. The breaks are (in 2017 dollars): 20% \$24,900; 40% \$48,300; 60% \$85,600; 80% \$149,600; 90% \$217,200; 95% \$309,900; 99% \$726,100; 99.9% \$3,073,400.

(4) Tax units with benefit are tax units with a net benefit of \$10 or more.

(5) After-tax income is expanded cash income less: individual income tax net of refundable credits; corporate income tax; payroll taxes (Social Security and Medicare); estate tax; and excise taxes.

(6) Average federal tax (includes individual and corporate income tax, payroll taxes for Social Security and Medicare, the estate tax, and excise taxes) as a percentage of average expanded cash income.

Proposal would (a) repeal the tax deferral of contributions to IRAs, Keogh accounts, defined contribution plan and defined benefit retirement plans; (b) repeal the saver's credit; (c) repeal exemption of income accrued within these retirement savings accounts; and (d) repeal tax on pension income, withdrawals from retirement savings accounts, as well as the early withdrawal penalty. Only impacts of these repeals in the current year are accounted for, which differs from standard TPC tables where tax benefits of retirement savings incentives are calculated on a present value basis. For a description of TPC's current law baseline, see <http://www.taxpolicycenter.org/taxtopics/Baseline-Definitions.cfm>

(2) Includes both filing and non-filing units but excludes those that are dependents of other tax units. Tax units with negative adjusted gross income are excluded from their respective income class but are included in the totals. For a description of expanded cash income, see <http://www.taxpolicycenter.org/TaxModel/Income.cfm>

(3) The income percentile classes used in this table are based on the income distribution for the entire population and contain an equal number of people, not tax units. The incomes used are adjusted for family size by dividing by the square root of the number of people in the tax unit. The resulting percentile breaks are (in 2017 dollars): 20% \$17,400; 40% \$31,900; 60% \$54,900; 80% \$91,000; 90% \$131,000; 95% \$184,300; 99% \$417,700; 99.9% \$1,763,600.

(4) Tax units with benefit are tax units with a net benefit of \$10 or more.

(5) After-tax income is expanded cash income less: individual income tax net of refundable credits; corporate income tax; payroll taxes (Social Security and Medicare); estate tax; and excise taxes.

(6) Average federal tax (includes individual and corporate income tax, payroll taxes for Social Security and Medicare, the estate tax, and excise taxes) as a percentage of average expanded cash income.
