[1] Includes, for example, returns filed from Army Post Office and Fleet Post Office addresses by members of the armed forces stationed overseas; returns filed by other U.S. citizens abroad; and returns filed by residents of Puerto Rico with income from sources outside Puerto Rico or with income earned as U.S. government employees.

NOTES: This table presents aggregates of all returns filed and processed through the Individual Master File (IMF) system during Calendar Year 2015, including any returns filed for tax years preceding 2014.

In general, during administrative or Master File processing, taxpayer reporting discrepancies are corrected only to the extent necessary to verify the income tax liability reported. Most of the other corrections to the taxpayer records used for these statistics could not be made because of time and resource constraints. The statistics in this table should, therefore, be used with the knowledge that some of the data have not been perfected or edited for statistical purposes and that U.S. totals in this table may not be altogether comparable to U.S. totals in other tables, as a result.

Classification by State was usually based on the taxpayer's home address. However, some taxpayers may have used the address of a tax lawyer, or accountant, or the address of a place of business; moreover, such addresses could each have been located in a State other than the State in which the taxpayer resided.

For explanation of the tax law changes which could affect the year-to-year analysis of data, refer to the respective years' "Individual Income Tax Returns, Preliminary Data" article published in the SOI Spring Bulletin. For further explanation of the tax terms, refer to the "Individual Income Tax Returns," Publication 1304.

[1] Includes, for example, returns filed from Army Post Office and Fleet Post Office addresses by members of the armed forces stationed overseas; returns filed by other U.S. citizens abroad; and returns filed by residents of Puerto Rico with income from sources outside Puerto Rico or with income earned as U.S. government employees.

NOTES: This table presents aggregates of all returns filed and processed through the Individual Master File (IMF) system during Calendar Year 2015, including any returns filed for tax years preceding 2014.

In general, during administrative or Master File processing, taxpayer reporting discrepancies are corrected only to the extent necessary to verify the income tax liability reported. Most of the other corrections to the taxpayer records used for these statistics could not be made because of time and resource constraints. The statistics in this table should, therefore, be used with the knowledge that some of the data have not been perfected or edited for statistical purposes and that U.S. totals in this table may not be altogether comparable to U.S. totals in other tables, as a result.

Classification by State was usually based on the taxpayer's home address. However, some taxpayers may have used the address of a tax lawyer, or accountant, or the address of a place of business; moreover, such addresses could each have been located in a State other than the State in which the taxpayer resided.

For explanation of the tax law changes which could affect the year-to-year analysis of data, refer to the respective years' "Individual Income Tax Returns, Preliminary Data" article published in the SOI Spring Bulletin. For further explanation of the tax terms, refer to the "Individual Income Tax Returns," Publication 1304.

[1] Includes, for example, returns filed from Army Post Office and Fleet Post Office addresses by members of the armed forces stationed overseas; returns filed by other U.S. citizens abroad; and returns filed by residents of Puerto Rico with income from sources outside Puerto Rico or with income earned as U.S. government employees.

NOTES: This table presents aggregates of all returns filed and processed through the Individual Master File (IMF) system during Calendar Year 2014, including any returns filed for tax years preceding 2013.

In general, during administrative or Master File processing, taxpayer reporting discrepancies are corrected only to the extent necessary to verify the income tax liability reported. Most of the other corrections to the taxpayer records used for these statistics could not be made because of time and resource constraints. The statistics in this table should, therefore, be used with the knowledge that some of the data have not been perfected or edited for statistical purposes and that U.S. totals in this table may not be altogether comparable to U.S. totals in other tables, as a result.

Classification by State was usually based on the taxpayer's home address. However, some taxpayers may have used the address of a tax lawyer, or accountant, or the address of a place of business; moreover, such addresses could each have been located in a State other than the State in which the taxpayer resided.

For explanation of the tax law changes which could affect the year-to-year analysis of data, refer to the respective years' "Individual Income Tax Returns, Preliminary Data" article published in the SOI Spring Bulletin. For further explanation of the tax terms, refer to the "Individual Income Tax Returns," Publication 1304.

[1] Includes, for example, returns filed from Army Post Office and Fleet Post Office addresses by members of the armed forces stationed overseas; returns filed by other U.S. citizens abroad; and returns filed by residents of Puerto Rico with income from sources outside Puerto Rico or with income earned as U.S. government employees.

NOTES: This table presents aggregates of all returns filed and processed through the Individual Master File (IMF) system during Calendar Year 2013, including any returns filed for tax years preceding 2012.

In general, during administrative or Master File processing, taxpayer reporting discrepancies are corrected only to the extent necessary to verify the income tax liability reported. Most of the other corrections to the taxpayer records used for these statistics could not be made because of time and resource constraints. The statistics in this table should, therefore, be used with the knowledge that some of the data have not been perfected or edited for statistical purposes and that U.S. totals in this table may not be altogether comparable to U.S. totals in other tables, as a result.

Classification by State was usually based on the taxpayer's home address. However, some taxpayers may have used the address of a tax lawyer, or accountant, or the address of a place of business; moreover, such addresses could each have been located in a State other than the State in which the taxpayer resided.

For explanation of the tax law changes which could affect the year-to-year analysis of data, refer to the respective years' "Individual Income Tax Returns, Preliminary Data" article published in the SOI Spring Bulletin. For further explanation of the tax terms, refer to the "Individual Income Tax Returns," Publication 1304.

[1] Includes, for example, returns filed from Army Post Office and Fleet Post Office addresses by members of the armed forces stationed overseas; returns filed by other U.S. citizens abroad; and returns filed by residents of Puerto Rico with income from sources outside Puerto Rico or with income earned as U.S. government employees.

NOTES: This table presents aggregates of all returns filed and processed through the Individual Master File (IMF) system during Calendar Year 2012, including any returns filed for tax years preceding 2011.

In general, during administrative or Master File processing, taxpayer reporting discrepancies are corrected only to the extent necessary to verify the income tax liability reported. Most of the other corrections to the taxpayer records used for these statistics could not be made because of time and resource constraints. The statistics in this table should, therefore, be used with the knowledge that some of the data have not been perfected or edited for statistical purposes and that U.S. totals in this table may not be altogether comparable to U.S. totals in other tables, as a result.

Classification by State was usually based on the taxpayer's home address. However, some taxpayers may have used the address of a tax lawyer, or accountant, or the address of a place of business; moreover, such addresses could each have been located in a State other than the State in which the taxpayer resided.

For explanation of the tax law changes which could affect the year-to-year analysis of data, refer to the respective years' "Individual Income Tax Returns, Preliminary Data" article published in the SOI Spring Bulletin. For further explanation of the tax terms, refer to the "Individual Income Tax Returns," Publication 1304.

[1] Includes returns with adjusted gross deficit.

[2] Includes, for example, returns filed from Army Post Office and Fleet Post Office addresses by members of the armed forces stationed overseas; returns filed by other U.S. citizens abroad; and returns filed by residents of Puerto Rico with income from sources outside Puerto Rico or with income earned as U.S. government employees.

NOTES: This table presents aggregates of all returns filed and processed through the Individual Master File (IMF) system during Calendar Year 2011, including any returns filed for tax years preceding 2010.

In general, during administrative or Master File processing, taxpayer reporting discrepancies are corrected only to the extent necessary to verify the income tax liability reported. Most of the other corrections to the taxpayer records used for these statistics could not be made because of time and resource constraints. The statistics in this table should, therefore, be used with the knowledge that some of the data have not been perfected or edited for statistical purposes and that U.S. totals in this table may not be altogether comparable to U.S. totals in other tables, as a result.

Classification by State was usually based on the taxpayer's home address. However, some taxpayers may have used the address of a tax lawyer, or accountant, or the address of a place of business; moreover, such addresses could each have been located in a State other than the State in which the taxpayer resided.

For explanation of the tax law changes which could affect the year-to-year analysis of data, refer to the respective years' "Individual Income Tax Returns, Preliminary Data" article published in the SOI Spring Bulletin. For further explanation of the tax terms, refer to the "Individual Income Tax Returns," Publication 1304.

[1] Includes returns with adjusted gross deficit.

[2] Includes, for example, returns filed from Army Post Office and Fleet Post Office addresses by members of the armed forces stationed overseas; returns filed by other U.S. citizens abroad; and returns filed by residents of Puerto Rico with income from sources outside Puerto Rico or with income earned as U.S. government employees.

NOTES: This table presents aggregates of all returns filed and processed through the Individual Master File (IMF) system during Calendar Year 2010, including any returns filed for tax years preceding 2009.

In general, during administrative or Master File processing, taxpayer reporting discrepancies are corrected only to the extent necessary to verify the income tax liability reported. Most of the other corrections to the taxpayer records used for these statistics could not be made because of time and resource constraints. The statistics in this table should, therefore, be used with the knowledge that some of the data have not been perfected or edited for statistical purposes and that U.S. totals in this table may not be altogether comparable to U.S. totals in other tables, as a result.

Classification by State was usually based on the taxpayer's home address. However, some taxpayers may have used the address of a tax lawyer, or accountant, or the address of a place of business; moreover, such addresses could each have been located in a State other than the State in which the taxpayer resided.

For explanation of the tax law changes which could affect the year-to-year analysis of data, refer to the respective years' "Individual Income Tax Returns, Preliminary Data" article published in the SOI Spring Bulletin. For further explanation of the tax terms, refer to the "Individual Income Tax Returns," Publication 1304.

* - Data for Tax Year 2008 includes returns that were filed by individuals only to receive the economic stimulus payment and who had no other reason to file. This may affect the data for various items shown in the table such as the total number of returns filed (including joint and paid preparer returns), number of exemptions, salaries and wages, and adjusted gross income.

[1] Includes returns with adjusted gross deficit.

[2] Includes, for example, returns filed from Army Post Office and Fleet Post Office addresses by members of the armed forces stationed overseas; returns filed by other U.S. citizens abroad; and returns filed by residents of Puerto Rico with income from sources outside Puerto Rico or with income earned as U.S. government employees.

NOTES: This table presents aggregates of all returns filed and processed through the Individual Master File (IMF) system during Calendar Year 2009, including any returns filed for tax years preceding 2008.

In general, during administrative or Master File processing, taxpayer reporting discrepancies are corrected only to the extent necessary to verify the income tax liability reported. Most of the other corrections to the taxpayer records used for these statistics could not be made because of time and resource constraints. The statistics in this table should, therefore, be used with the knowledge that some of the data have not been perfected or edited for statistical purposes and that U.S. totals in this table may not be altogether comparable to U.S. totals in other tables, as a result. Also, see footnote 2, above for differences in tax return coverage, which affects U.S. totals in this table.

Classification by State was usually based on the taxpayer's home address. However, some taxpayers may have used the address of a tax lawyer, or accountant, or the address of a place of business; moreover, such addresses could each have been located in a State other than the State in which the taxpayer resided.

For explanation of the tax law changes which could affect the year-to-year analysis of data, refer to the respective years' "Individual Income Tax Returns, Preliminary Data" article published in the SOI Spring Bulletin. For further explanation of the tax terms, refer to the "Individual Income Tax Returns," Publication 1304.

* - Data for Tax Year 2007 includes returns that were filed by individuals only to receive the economic stimulus payment and who had no other reason to file. This may affect the data for various items shown in the table such as the total number of returns filed (including joint and paid preparer returns), number of exemptions, salaries and wages, and adjusted gross income.
[1] Includes returns with adjusted gross deficit.
[2] Includes, for example, returns filed from Army Post Office and Fleet Post Office addresses by members of the armed forces stationed overseas; returns filed by other U.S. citizens abroad; and returns filed by residents of Puerto Rico with income from sources outside Puerto Rico or with income earned as U.S. government employees.
NOTES: This table presents aggregates of all returns filed and processed through the Individual Master File (IMF) system during Calendar Year 2008, including any returns filed for tax years preceding 2007.
In general, during administrative or Master File processing, taxpayer reporting discrepancies are corrected only to the extent necessary to verify the income tax liability reported. Most of the other corrections to the taxpayer records used for these statistics could not be made because of time and resource constraints. The statistics in this table should, therefore, be used with the knowledge that some of the data have not been perfected or edited for statistical purposes and that U.S. totals in this table may not be altogether comparable to U.S. totals in other tables, as a result. Also, see footnote 2, above for differences in tax return coverage, which affects U.S. totals in this table.
Classification by State was usually based on the taxpayer's home address. However, some taxpayers may have used the address of a tax lawyer, or accountant, or the address of a place of business; moreover, such addresses could each have been located in a State other than the State in which the taxpayer resided.
For explanation of the tax law changes which could affect the year-to-year analysis of data, refer to the respective years' "Individual Income Tax Returns, Preliminary Data" article published in the SOI Spring Bulletin. For further explanation of the tax terms, refer to the "Individual Income Tax Returns," Publication 1304.

[1] Includes returns with adjusted gross deficit.
[2] U.S. totals include (a) substitutes for returns, whereby the Internal Revenue Service constructs returns for certain nonfilers on the basis of available information and imposes an income tax on the resulting estimate of the tax base, i.e. "taxable income," and (b) returns of nonresident or departing aliens.

[3] Includes, for example, returns filed from Army Post Office and Fleet Post Office addresses by members of the armed forces stationed overseas; returns filed by other U.S. citizens abroad; and returns filed by residents of Puerto Rico with income from sources outside Puerto Rico or with income earned as U.S. government employees.
NOTES: This table presents aggregates of all returns filed and processed through the Individual Master File (IMF) system during Calendar Year 2007, including any returns filed for tax years preceding 2006.
In general, during administrative or Master File processing, taxpayer reporting discrepancies are corrected only to the extent necessary to verify the income tax liability reported. Most of the other corrections to the taxpayer records used for these statistics could not be made because of time and resource constraints. The statistics in Table 2 should, therefore, be used with the knowledge that some of the data have not been perfected or edited for statistical purposes and that U.S. totals in this table may not be altogether comparable to U.S. totals in Tables 1 and 3, as a result. Also, see footnote 2, above for differences in tax return coverage, which affects U.S. totals in this table.
Classification by State was usually based on the taxpayer's home address. However, some taxpayers may have used the address of a tax lawyer, or accountant, or the address of a place of business; moreover, such addresses could each have been located in a State other than the State in which the taxpayer resided.
For explanation of the tax law changes which could affect the year-to-year analysis of data, refer to the respective years' "Individual Income Tax Returns, Preliminary Data" article published in the SOI Winter Bulletin. For further explanation of the tax terms, refer to the "Individual Income Tax Returns," Publication 1304.

[1] Includes returns with adjusted gross deficit.
[2] Includes, for example, returns filed from Army Post Office and Fleet Post Office addresses by members of the armed forces stationed overseas; returns filed by other U.S. citizens abroad; and returns filed by residents of Puerto Rico with income from sources outside Puerto Rico or with income earned as U.S.

government employees.
NOTE: This table presents aggregates of *all* returns filed and processed through the Individual Master File (IMF) system during Calendar Year 2006, including any returns filed for tax years preceding 2005.
In general, during administrative or Master File processing, taxpayer reporting discrepancies are corrected only to the extent necessary to verify the income tax liability reported. Most of the other corrections to the taxpayer records used for these statistics could not be made because of time and resource constraints. The statistics in Table 2 should, therefore, be used with the knowledge that some of the data have not been perfected or edited for statistical purposes and that U.S. totals in this table may not be altogether comparable to U.S. totals in Tables 1 and 3, as a result. Also, see footnote 2, above for differences in tax return coverage, which affects U.S. totals in this table.
Classification by State was usually based on the taxpayer's home address. However, some taxpayers may have used the address of a tax lawyer, or accountant, or the address of a place of business; moreover, such addresses could each have been located in a State other than the State in which the taxpayer resided.
For explanation of the tax law changes which could affect the year-to-year analysis of data, refer to the respective years' "Individual Income Tax Returns, Preliminary Data" article published in the SOI Winter Bulletin. For further explanation of the tax terms, refer to the "Individual Income Tax Returns," Publication 1304.

[1] Includes returns with adjusted gross deficit.
[2] Includes, for example, returns filed from Army Post Office and Fleet Post Office addresses by members of the armed forces stationed overseas; returns filed by other U.S. citizens abroad; and returns filed by residents of Puerto Rico with income from sources outside Puerto Rico or with income earned as U.S.

government employees.
NOTE: This table presents aggregates of *all* returns filed and processed through the Individual Master File (IMF) system during Calendar Year 2005, including any returns filed for tax years preceding 2004.
In general, during administrative or Master File processing, taxpayer reporting discrepancies are corrected only the extent necessary to verify the income tax liability reported. Most of the other corrections to the taxpayer records used for these statistics could not be made because of time and resource constraints. The statistics in Table 2 should, therefore, be used with the knowledge that some of the data have not been perfected or edited for statistical purposes and that U.S. totals in this table may not be altogether comparable to U.S. totals in Tables 1 and 3, as a result. Also, see footnote 2, above for differences in tax return coverage, which affects U.S. totals in this table.
Classification by State was usually based on the taxpayer's home address. However, some taxpayers may have used the address of a tax lawyer, or accountant, or the address of a place of business; moreover, such addresses could each have been located in a State other than the State in which the taxpayer resided.
For explanation of the tax law changes which could affect the year-to-year analysis of data, refer to the respective years' "Individual Income Tax Returns, Preliminary Data" article published in the SOI Winter Bulletin. For further explanation of the tax terms, refer to the "Individual Income Tax Returns," Publication 1304.

[1] Includes returns with adjusted gross deficit.
[2] Includes, for example, returns filed from Army Post Office and Fleet Post Office addresses by members of the armed forces stationed overseas; returns filed by other U.S. citizens abroad; and returns filed by residents of Puerto Rico with income from sources outside Puerto Rico or with income earned as U.S. Government employees.
NOTE: This table presents aggregates of all returns filed and processed through the Individual Master File (IMF) system during Calendar Year 2004, including any returns filed for tax years preceding 2003.
In general, during administrative or Master File processing, taxpayer reporting discrepancies are corrected only to the extent necessary to verify the income tax liability reported. Most of the other corrections to the taxpayer records used for these statistics could not be made because of time and resource constraints. The statistics in Table 2 should, therefore, be used with the knowledge that some of the data have not been perfected or edited for statistical purposes and that U.S. totals in this table may not be altogether comparable to U.S. totals in Tables 1 and 3, as a result. Also, see footnote 2, above for differences in tax return coverage, which affects U.S. totals in this table.
Classification by State was usually based on the taxpayer's home address. However, some taxpayers may have used the address of a tax lawyer or accountant or the address of a place of business; moreover, such addresses could each have been located in a State other than the State in which the taxpayer resided.
