(2) Includes both filing and non-filing units but excludes those that are dependents of other tax units. Tax units with negative adjusted gross income are excluded from their respective income class but are included in the totals. For a description of expanded cash income, see

http://www.taxpolicycenter.org/TaxModel/income.cfm

<sup>\*</sup> Non-zero value rounded to zero; \*\* Insufficient data

<sup>(1)</sup> Calendar year. Baseline is current law. Due to data limitations, excludes the following provisions: repeal of deduction for moving expenses; limitation on exclusion of employee achievement awards and certain other fringe benefits; repeal of exclusion for qualified moving expense reimbursement; reduction in minimum age for allowable in-service distributions; small business accounting method reform and simplification; modifications to state and local bond interest (portion attributable to pass-through entities); and repeal of technical termination of partnerships.

<sup>(3)</sup> The income percentile classes used in this table are based on the income distribution for the entire population and contain an equal number of people, not tax units. The breaks are (in 2017 dollars): 20% \$25,000; 40% \$48,600; 60% \$86,100; 80% \$149,400; 90% \$216,800; 95% \$307,900; 99% \$732,800; 99.9% \$3,439,900.

<sup>(4)</sup> Includes tax units with a change in federal tax burden of \$10 or more in absolute value.
