(1) Calendar year. Baseline is current law. Includes all provisions in the House Bill H.R. 1, The Tax Cuts and Jobs Act, as ordered reported by the Committee on Ways and Means.

(2) Includes both filing and non-filing units but excludes those that are dependents of other tax units. Tax units with negative adjusted gross income are excluded from their respective income class but are included in the totals. For a description of expanded cash income, see

<http://www.taxpolicycenter.org/TaxModel/income.cfm>

(3) The income percentile classes used in this table are based on the income distribution for the entire population and contain an equal number of people, not tax units. The breaks are (in 2017 dollars): 20% \$25,000; 40% \$48,600; 60% \$86,100; 80% \$149,400; 90% \$216,800; 95% \$307,900; 99% \$732,800; 99.9% \$3,439,900.

(4) Marginal tax benefit is calculated by adding \$1,000 to charitable contributions and recomputing tax liability.
