Source: Urban-Brookings Tax Policy Center Microsimulation Model (version 0217-1). * non-zero value rounded to zero; ** insufficient data

Number of AMT Taxpayers (millions). Baseline: 0.2 Proposal: 0.2

* Non-zero value rounded to zero; ** Insufficient data

(1) Calendar year. Baseline is current law incorporating the impact of the Tax Cuts and Jobs Act. Proposal would expand the EITC for childless workers by: increasing phase-in rate to 30 percent and phase-out rate to 15.98 percent; increasing end of phase-in to same value as for those with one child; increasing start of phase-out to same value as for those with children; lowering minimum eligible age from 25 to 21. Proposal would also expand EITC for other workers by increasing phase-in rate to 65.28 percent for those with one child, 76.8 percent for those with two children, and 86.4 percent for those with three or more children.

http://www.taxpolicycenter.org/taxtopics/Baseline-Definitions.cfm

(2) Includes both filing and non-filing units but excludes those that are dependents of other tax units. Tax units with negative adjusted gross income are excluded from their respective income class but are included in the totals. For a description of expanded cash income, see

http://www.taxpolicycenter.org/TaxModel/income.cfm

(3) The income percentile classes used in this table are based on the income distribution for the entire population and contain an equal number of people, not tax units. The breaks are (in 2017 dollars): 20% \$25,000; 40% \$48,600; 60% \$86,100; 80% \$149,400; 90% \$216,800; 95% \$307,900; 99% \$732,800; 99.9% \$3,439,900.

(4) Includes tax units with a change in federal tax burden of \$10 or more in absolute value.

(5) After-tax income is expanded cash income less: individual income tax net of refundable credits; corporate income tax; payroll taxes (Social Security and Medicare); estate tax; and excise taxes.

(6) Average federal tax (includes individual and corporate income tax, payroll taxes for Social Security and Medicare, the estate tax, and excise taxes) as a percentage of average expanded cash income.

* Non-zero value rounded to zero; ** Insufficient data

(1) Calendar year. Baseline is current law incorporating the impact of the Tax Cuts and Jobs Act. Proposal would expand the EITC for childless workers by: increasing phase-in rate to 30 percent and phase-out rate to 15.98 percent; increasing end of phase-in to same value as for those with one child; increasing start of phase-out to same value as for those with children; lowering minimum eligible age from 25 to 21. Proposal would also expand EITC for other workers by increasing phase-in rate to 65.28 percent for those with

one child, 76.8 percent for those with two children, and 86.4 percent for those with three or more children.

http://www.taxpolicycenter.org/taxtopics/Baseline-Definitions.cfm

(2) Includes both filing and non-filing units but excludes those that are dependents of other tax units. Tax units with negative adjusted gross income are excluded from their respective income class but are included in the totals. For a description of expanded cash income, see

http://www.taxpolicycenter.org/TaxModel/income.cfm

(3) The income percentile classes used in this table are based on the income distribution for the entire population and contain an equal number of people, not tax units. The incomes used are adjusted for family size by dividing by the square root of the number of people in the tax unit. The resulting percentile breaks are (in 2017 dollars): 20% \$17,500; 40% \$32,200; 60% \$55,400; 80% \$91,100; 90% \$130,800; 95% \$183,600; 99% \$422,500; 99.9% \$1,969,200.

(4) Includes tax units with a change in federal tax burden of \$10 or more in absolute value.
