[1] Includes, for example, returns filed from Army Post Office and Fleet Post Office addresses by members of the armed forces stationed overseas; returns filed by other U.S. citizens abroad; and returns filed by residents of Puerto Rico with income from sources outside Puerto Rico or with income earned as U.S. government employees.

NOTES: This table presents aggregates of all returns filed and processed through the Individual Master File (IMF) system during Calendar Year 2017, including any returns filed for tax years preceding 2016.

In general, during administrative or Master File processing, taxpayer reporting discrepancies are corrected only to the extent necessary to verify the income tax liability reported. Most of the other corrections to the taxpayer records used for these statistics could not be made because of time and resource constraints.

The statistics in this table should, therefore, be used with the knowledge that some of the data have not been perfected or edited for statistical purposes and that U.S. totals in this table may not be altogether comparable to U.S. totals in other tables, as a result.

Classification by State was usually based on the taxpayer's home address. However, some taxpayers may have used the address of a tax lawyer, or accountant, or the address of a place of business; moreover, such addresses could each have been located in a State other than the State in which the taxpayer resided.

For explanation of the tax law changes which could affect the year-to-year analysis of data, refer to the respective years' "Individual Income Tax Returns, Preliminary Data" article published in the SOI Spring Bulletin. For further explanation of the tax terms, refer to the "Individual Income Tax Returns," Publication 1304.

[1] Includes, for example, returns filed from Army Post Office and Fleet Post Office addresses by members of the armed forces stationed overseas; returns filed by other U.S. citizens abroad; and returns filed by residents of Puerto Rico with income from sources outside Puerto Rico or with income earned as U.S. government employees.

NOTES: This table presents aggregates of all returns filed and processed through the Individual Master File (IMF) system during Calendar Year 2016, including any returns filed for tax years preceding 2015.

In general, during administrative or Master File processing, taxpayer reporting discrepancies are corrected only to the extent necessary to verify the income tax liability reported. Most of the other corrections to the taxpayer records used for these statistics could not be made because of time and resource constraints.

The statistics in this table should, therefore, be used with the knowledge that some of the data have not been perfected or edited for statistical purposes and that U.S. totals in this table may not be altogether comparable to U.S. totals in other tables, as a result.

Classification by State was usually based on the taxpayer's home address. However, some taxpayers may have used the address of a tax lawyer, or accountant, or the address of a place of business; moreover, such addresses could each have been located in a State other than the State in which the taxpayer resided.

For explanation of the tax law changes which could affect the year-to-year analysis of data, refer to the respective years' "Individual Income Tax Returns, Preliminary Data" article published in the SOI Spring Bulletin. For further explanation of the tax terms, refer to the "Individual Income Tax Returns," Publication 1304.
