Proposal: 0.2

* Non-zero value rounded to zero; ** Insufficient data

(1) Calendar year. Baseline is the law currently in place for 2019 as of March 17, 2020. Proposal would repeal the Affordable Care Act's: 3.8 percent net investment income tax (NIIT), which applies to the lesser of net investment income or the excess of modified adjusted gross income over \$200,000 for individuals (\$250,000 for married couples filing jointly); the 0.9 percent additional Medicare tax on earnings in excess of \$200,000 for individuals (\$250,000 for married couples); the \$2,500 limit on contributions to Medical Flexible Spending Accounts; the excise tax on employers offering inadequate health insurance coverage; and the excise tax on pharmaceutical manufacturers and importers. Table does not include the Premium Tax Credit, which is not treated as a tax provision in the TPC baseline due to its similarity to a spending program.

<http://www.taxpolicycenter.org/taxtopics/Baseline-Definitions.cfm>

(2) Includes both filing and non-filing units but excludes those that are dependents of other tax units. Tax units with negative adjusted gross income are excluded from their respective income class but are included in the totals. For a description of expanded cash income, see

<http://www.taxpolicycenter.org/TaxModel/income.cfm>

(3) Includes tax units with a change in federal tax burden of \$10 or more in absolute value.

(4) After-tax income is expanded cash income less: individual income tax net of refundable credits; corporate income tax; payroll taxes (Social Security and Medicare); estate taxes; and excise taxes.

(5) Average federal tax (includes individual and corporate income tax, payroll taxes for Social Security and Medicare, the estate tax, and excise taxes) as a percentage of average expanded cash income.

* Non-zero value rounded to zero; ** Insufficient data

(1) Calendar year. Baseline is the law currently in place for 2019 as of March 17, 2020. Proposal would repeal the Affordable Care Act's: 3.8 percent net investment income tax (NIIT), which applies to the lesser of net investment income or the excess of modified adjusted gross income over \$200,000 for individuals (\$250,000 for married couples filing jointly); the 0.9 percent additional Medicare tax on earnings in excess of \$200,000 for individuals (\$250,000 for married couples); the \$2,500 limit on contributions to Medical Flexible Spending Accounts; the excise tax on employers offering inadequate health insurance coverage; and the excise tax on pharmaceutical manufacturers and importers. Table does not include the Premium Tax Credit, which is not treated as a tax provision in the TPC baseline due to its similarity to a spending program.

<http://www.taxpolicycenter.org/taxtopics/Baseline-Definitions.cfm>

(2) Includes both filing and non-filing units but excludes those that are dependents of other tax units. Tax units with negative adjusted gross income are excluded from their respective income class but are included in the totals. For a description of expanded cash income, see

<http://www.taxpolicycenter.org/TaxModel/income.cfm>

(3) Includes tax units with a change in federal tax burden of \$10 or more in absolute value.

(4) After-tax income is expanded cash income less: individual income tax net of refundable credits; corporate income tax; payroll taxes (Social Security and Medicare); estate tax; and excise taxes.

(5) Average federal tax (includes individual and corporate income tax, payroll taxes for Social Security and Medicare, the estate tax, and excise taxes) as a percentage of average expanded cash income.
