* Non-zero value rounded to zero; ** Insufficient data; *** Since baseline tax burden is negative, positive change indicates a net increase in federal subsidies Number of AMT Taxpayers (millions). Baseline: 0.2 Proposal: 0.2

(1) Calendar year. Baseline is the law currently in place for 2019 as of March 17, 2020 but also includes the Economic Impact Payments for Individuals enacted by the Coronavirus Aid, Relief, and Economic Security (CARES) Act. The proposal would provide a refundable tax credit of up to \$1,200 for married couples (\$600 for others) plus an additional \$600 for each eligible child under 17. The credit would phase out at a rate of 5 percent of AGI in excess of \$150,000 for married couples, \$112,500 for heads of household, and \$75,000 for others. We model the credit on the 2019 population at 2019 income levels. Estimates assume 100 percent take-up for non-filers and because of data limitations, do not incorporate the Social Security Number (SSN) requirements.

http://www.taxpolicycenter.org/taxtopics/Baseline-Definitions.cfm

(2) Includes both filing and non-filing units but excludes those that are dependents of other tax units. Tax units with negative adjusted gross income are excluded from their respective income class but are included in the totals. For a description of expanded cash income, see

http://www.taxpolicycenter.org/TaxModel/income.cfm

(3) After-tax income is expanded cash income less: individual income tax net of refundable credits; corporate income tax; payroll taxes (Social Security and Medicare); estate tax; and excise taxes.

(4) Average federal tax (includes individual and corporate income tax, payroll taxes for Social Security and Medicare, the estate tax, and excise taxes) as a percentage of average expanded cash income.

* Non-zero value rounded to zero; ** Insufficient data; *** Since baseline tax burden is negative, positive change indicates a net increase in federal subsidies

(1) Calendar year. Baseline is the law currently in place for 2019 as of March 17, 2020 but also includes the Economic Impact Payments for

Individuals enacted by the Coronavirus Aid, Relief, and Economic Security (CARES) Act. The proposal would provide a refundable tax credit

of up to \$1,200 for married couples (\$600 for others) plus an additional \$600 for each eligible child under 17. The credit would phase out

at a rate of 5 percent of AGI in excess of \$150,000 for married couples, \$112,500 for heads of household, and \$75,000 for others. We model

the credit on the 2019 population at 2019 income levels. Estimates assume 100 percent take-up for non-filers and because of data

limitations, do not incorporate the Social Security Number (SSN) requirements.

http://www.taxpolicycenter.org/taxtopics/Baseline-Definitions.cfm

(2) Includes both filing and non-filing units but excludes those that are dependents of other tax units. Tax units with negative adjusted gross income are excluded from their respective income class but are included in the totals. For a description of expanded cash income, see

http://www.taxpolicycenter.org/TaxModel/income.cfm

(3) After-tax income is expanded cash income less: individual income tax net of refundable credits; corporate income tax; payroll taxes (Social Security and Medicare); estate tax; and excise taxes.
