* Non-zero value rounded to zero; ** Insufficient data

(1) Calendar year. Baseline is the law currently in place as of November 9, 2021.

<http://www.taxpolicycenter.org/taxtopics/Baseline-Definitions.cfm>

(2) Includes both filing and non-filing units but excludes those that are dependents of other tax units. Tax units with negative adjusted gross income are excluded from their respective income class but are included in the totals. For a description of expanded cash income, see

<http://www.taxpolicycenter.org/TaxModel/income.cfm>

(3) The income percentile classes used in this table are based on the income distribution for the entire population and contain an equal number of people, not tax units. The breaks are (in 2020 dollars): 20% \$27,200; 40% \$53,900; 60% \$96,700; 80% \$176,400; 90% \$257,500; 95% \$369,300; 99% \$884,900; 99.9% \$3,998,700.

(4) Includes tax units with a change in federal tax burden of \$10 or more in absolute value.

(5) Includes provisions contained in JCX-45-21 except: provisions related to expanding access to health coverage; Subtitle E, Part 4, item 1; Subtitle H, Part 5, item 5; and provisions with a revenue change of less than \$50 million in the years of our analysis. Includes Subtitle G, Part 6 as amended by Rules Committee Print 117-19.

(6) Includes following provisions from JCX-45-21: Subtitle F, Part 1, item 1; Subtitle F, Part 2; Subtitle F, Part 7; Subtitle G, Part 1; Subtitle G, Part 2, item 1; Subtitle G, Part 6 as amended by Rules Committee Print 117-19; Subtitle H, Part 1, sections A-C; Subtitle H, Part 1, section E, item 7; Subtitle H, Part 1, section E, item 11; Subtitle H, Part 1, section E, item 13; Subtitle H, Part 2; and Subtitle H, Part 5, item 2. For certain proposals, the TPC model is detailed enough to estimate the average tax change by income group but, due to data limitations, we cannot assign the tax change to individual tax units. Thus, for those proposals, we cannot reliably estimate the percent of tax units with a tax increase or cut.
