Proposal: 0.5

* Non-zero value rounded to zero; ** Insufficient data

(1) Calendar Year. Baseline is the law currently in place as of November 14, 2021. Provision would repeal the \$10,000 limit on deductible state and local taxes for taxpayers with adjusted gross income (AGI) less than \$400,000. The \$10,000 limit would phase in rateably between \$400,000 and \$500,000 of AGI (for married individuals filing a separate return, the limit would be \$5,000 and would phase in between \$200,000 and \$250,000 of AGI).

<http://www.taxpolicycenter.org/taxtopics/Baseline-Definitions.cfm>

(2) Includes both filing and non-filing units but excludes those that are dependents of other tax units. Tax units with negative adjusted gross income are excluded from their respective income class but are included in the totals. For a description of expanded cash income, see

<http://www.taxpolicycenter.org/TaxModel/income.cfm>

(3) The income percentile classes used in this table are based on the income distribution for the entire population and contain an equal number of people, not tax units. The breaks are (in 2020 dollars): 20% \$27,400; 40% \$54,200; 60% \$96,000; 80% \$174,900; 90% \$254,500; 95% \$366,100; 99% \$867,100; 99.9% \$3,981,100.

(4) Includes tax units with a change in federal tax burden of \$10 or more in absolute value.

(5) After-tax income is expanded cash income less: individual income tax net of refundable credits; corporate income tax; payroll taxes (Social Security and Medicare); estate tax; and excise taxes.

(6) Average federal tax (includes individual and corporate income tax, payroll taxes for Social Security and Medicare, the estate tax, and excise taxes) as a percentage of average expanded cash income.

* Non-zero value rounded to zero; ** Insufficient data

(1) Calendar Year. Baseline is the law currently in place as of November 14, 2021. Provision would repeal the \$10,000 limit on deductible state and local taxes for taxpayers with adjusted gross income (AGI) less than \$400,000. The \$10,000 limit would phase in ratably between \$400,000 and \$500,000 of AGI (for married individuals filing a separate return, the limit would be \$5,000 and would phase in between \$200,000 and \$250,000 of AGI).

<http://www.taxpolicycenter.org/taxtopics/Baseline-Definitions.cfm>

(2) Includes both filing and non-filing units but excludes those that are dependents of other tax units. Tax units with negative adjusted gross income are excluded from their respective income class but are included in the totals. For a description of expanded cash income, see

<http://www.taxpolicycenter.org/TaxModel/income.cfm>

(3) The income percentile classes used in this table are based on the income distribution for the entire population and contain an equal number of people, not tax units. The incomes used are adjusted for family size by dividing by the square root of the number of people in the tax unit. The resulting percentile breaks are (in 2020 dollars): 20% \$19,100; 40% \$37,200; 60% \$63,800; 80% \$107,000; 90% \$155,200; 95% \$218,300; 99% \$503,700; 99.9% \$2,239,200.

(4) Includes tax units with a change in federal tax burden of \$10 or more in absolute value.

(5) After-tax income is expanded cash income less: individual income tax net of refundable credits; corporate income tax; payroll taxes (Social Security and Medicare); estate tax; and excise taxes.

(6) For income categories for which the baseline tax burden is negative, a positive percent change in average federal tax indicates a net increase in federal subsidies, and a negative percent change indicates a net decrease in federal subsidies.

(7) Average federal tax (includes individual and corporate income tax, payroll taxes for Social Security and Medicare, the estate tax, and excise taxes) as a percentage of average expanded cash income.

Table T21-0281
Repeal \$10,000 Limit on Deductible State and Local Taxes (SALT) for those with Adjusted Gross Income (AGI) less than \$400,000
Phase in Limit between \$400,000 and \$500,000 of AGI

(3) The income percentile classes used in this table are based on the income distribution for the entire population and contain an equal number of people, not tax units. The incomes used are adjusted for family size by dividing by the square root of the number of people in the tax unit. The resulting percentile breaks are (in 2020 dollars): 20% \$19,100; 40% \$37,200; 60% \$63,800; 80% \$107,000; 90% \$155,200; 95% \$218,300; 99% \$503,700; 99.9% \$2,239,200.

(4) Includes tax units with a change in federal tax burden of \$10 or more in absolute value.

(5) After-tax income is expanded cash income less: individual income tax net of refundable credits; corporate income tax; payroll taxes (Social Security and Medicare); estate tax; and excise taxes.

(6) For income categories for which the baseline tax burden is negative, a positive percent change in average federal tax indicates a net increase in federal subsidies, and a negative percent change indicates a net decrease in federal subsidies.

(7) Average federal tax (includes individual and corporate income tax, payroll taxes for Social Security and Medicare, the estate tax, and excise taxes) as a percentage of average expanded cash income.
