Source: IRS, Statistics of Income Division, Historical Table 2, October 2021; Tax Policy Center analysis.

Notes: [1] Table shows taxes allowed as an itemized deduction from adjusted gross income, including personal property taxes, state and local income taxes or general sales taxes, taxes paid to foreign countries or U.S. possessions (unless a foreign tax credit was claimed), and real estate taxes except those levied for improvements that tended to increase the value of the property.

[2] "Other Areas" include returns filed from Army Post Office and Fleet Post Office addresses by members of the armed forces stationed overseas; returns filed by other U.S. citizens abroad; and returns filed in Puerto Rico and by residents of Puerto Rico with income from sources outside Puerto Rico or with income earned as U.S. government employees.

[3] Data presented in this table includes the following variables: Number of returns with taxes paid (N18300) and Taxes paid amount (A18300). The IRS documentation guide is available here: https://www.irs.gov/statistics/soi-tax-stats-historic-table-2.

Source: IRS, Statistics of Income Division, Historical Table 2, October 2021; Tax Policy Center analysis.

Notes: [1] Table shows taxes allowed as an itemized deduction from adjusted gross income, including personal property taxes, state and local income taxes or general sales taxes, taxes paid to foreign countries or U.S. possessions (unless a foreign tax credit was claimed), and real estate taxes except those levied for improvements that tended to increase the value of the property.

[2] "Other Areas" include returns filed from Army Post Office and Fleet Post Office addresses by members of the armed forces stationed overseas; returns filed by other U.S. citizens abroad; and returns filed in Puerto Rico and by residents of Puerto Rico with income from sources outside Puerto Rico or with income earned as U.S. government employees.

[3] Data presented in this table includes the following variables: Number of returns with taxes paid (N18300) and Taxes paid amount (A18300). The IRS documentation guide is available here: https://www.irs.gov/statistics/soi-tax-stats-historic-table-2.

Source: IRS, Statistics of Income Division, Historical Table 2, October 2021; Tax Policy Center analysis.

Notes: [1] Table shows taxes allowed as an itemized deduction from adjusted gross income, including personal property taxes, state and local income taxes or general sales taxes, taxes paid to foreign countries or U.S. possessions (unless a foreign tax credit was claimed), and real estate taxes except those levied for improvements that tended to increase the value of the property.

[2] "Other Areas" include returns filed from Army Post Office and Fleet Post Office addresses by members of the armed forces stationed overseas; returns filed by other U.S. citizens abroad; and returns filed in Puerto Rico and by residents of Puerto Rico with income from sources outside Puerto Rico or with income earned as U.S. government employees.

[3] Data presented in this table includes the following variables: Number of returns with taxes paid (N18300) and Taxes paid amount (A18300). The IRS documentation guide is available here: https://www.irs.gov/statistics/soi-tax-stats-historic-table-2.

1-Oct-20

Taxes Paid Deduction, by State and Size of Adjusted Gross Income, Tax Year 2018

State and Item	All returns	Size of adjusted gross income								
		$1 under $10,000	$10,000 under $25,000	$25,000 under $50,000	$50,000 under $75,000	$75,000 under $100,000	$100,000 under $200,000	$200,000 under $500,000	$500,000 under $1,000,000	$1,000,000 or more

(1) Includes, returns filed from Army Post Office and Fleet Post Office addresses by members of the armed forces stationed overseas; returns filed by other U.S. citizens abroad; and returns filed in Puerto Rico also by residents of Puerto Rico with income from sources outside Puerto Rico or with income earned as U.S. government employees.

NOTE:

Taxes shown were allowed as an itemized deduction from adjusted gross income, including personal property taxes, state and local income taxes or general sales taxes, taxes paid to foreign countries or U.S. possessions, and real estate taxes. Real estate taxes were allowed as a deduction from adjusted gross income for taxpayers who elected to increase the value of the property, how for 2018 the deduction for state and local income, sales, and property taxes was limited to a combined, total deduction of $10,000 ($5,000 if married filing separately).

This table presents aggregates of all returns filed and processed through the Individual Master File (IMF) system during Calendar Year 2019, including any returns filed for tax years preceding 2018.

Taxpayers may have claimed deductions for taxes paid to a state other than the one in which they resided at the end of the year. Taxpayers generally deduct taxes in the state where they resided, so the taxpayer records used for these statistics could not be made because of time and resource constraints. The statistics in this table should, therefore, be used with the knowledge that some of the data have not been perfected or edited for statistical purposes.

Taxpayers may have claimed deductions for taxpayer's home address. However, some taxpayers may have used the address of a tax lawyer or accountant or the address of a place of business. moreover, such addresses could each have been located in a State other than the State in which the taxpayer resided.

For explanation of the tax law changes which could affect the year- to- year analysis of data, refer to the respective years' "Individual Income Tax Returns, Preliminary Data" article published in the SOI Spring publication. For a discussion of data limitations, see Publication 1304, Publication 1304 Publication 1304

(1) Includes returns with adjusted gross income less than zero.

NOTE: Includes deductions for taxes paid by Army Post Office and Fleet Post Office addresses by members of the armed forces stationed overseas; returns filed by the U.S. citizens abroad; and returns filed by residents of Puerto Rico with income from sources outside Puerto Rico or with income earned as U.S. government employees.

Table shows taxes allowed as an itemized deduction from adjusted gross income, including personal property taxes; state and local income taxes withheld from salaries, wages, pensions, and annuities; estimated taxes paid; and general sales taxes. Excludes foreign tax credit data (claimed), and real estate taxes except those taxes for improvements that tended to increase the value of the property.

NOTES: This table presents aggregates of all returns filed and processed through the Individual Master File (IMF) system during Calendar Year 2011, including returns for prior tax years processed during 2011.

In general, during administration of Master File processing, taxpayer reporting discrepancies are corrected only to the extent necessary to verify the income tax liability reported. Most of the other corrections to the taxpayer records used for these statistics could not be made because of time and resource constraints.

Consequently, the statistics in this publication may not reflect the taxpayer's ultimate liability after all adjustments have been performed or related tax statistical purposes and the U.S. totals in this table may not be altogether comparable to U.S. totals in other tables, as a result.

Classification by State was usually based on the taxpayer's home address. However, some taxpayer may have used the address of a tax lawyer, or accountant, instead of their own address, or combined returns filed by husband and wife who lived in different States, or the address may be omitted on the taxpayer record.

Data for 2010 reflect the Tax Relief Act that changed which could affect the same-year analysis of data, refer to the respective year "Individual Income Tax Returns, Preliminary Data" article published in the SOI Spring Bulletin. For further explanation of the tax terms, refer to the "Individual Income Tax Returns," Publication 1304.

(1) Includes returns with adjusted gross income less than zero.

NOTE: Includes returns filed from Army Post Office and Fleet Post Office addresses by members of the armed forces stationed overseas; returns filed by the U.S. citizens abroad; and returns filed by residents of Puerto Rico with income from sources outside Puerto Rico or with income earned as U.S. government employees.

Table shows taxes allowed as an itemized deduction from adjusted gross income, including personal property taxes; state and local income taxes withheld from salaries, wages, pensions, and annuities; estimated state and local income taxes; and foreign tax credit (see Schedule A and real estate taxes include those levied for improvements that tended to increase the value of the property.

NOTES: This table presents aggregates of all returns filed and processed through the Individual Master File (IMF) system during Calendar Year 2020, including returns for prior tax years processed in 2020.

In general, during administration of Master File processing, taxpayer reporting discrepancies are corrected only to the extent necessary to satisfy the income tax liability reported. Most of the other corrections to the taxpayer records used for these statistics could not be made because of time and resource constraints.

Because of the processing criteria mentioned above, some returns with errors may not have been perfected or related for statistical purposes and the U.S. totals in this table may not be altogether comparable to U.S. totals in other tables, as a result.

Classification by State was usually based on the taxpayer's home address. However, some taxpayer may have used the address of a tax lawyer, or business, rather than their own residence, and some taxpayers may have changed their address after filing the return but before the end of the taxpayer accounting period.

Taxpayers who changed their filing status from a joint return (husband and wife filing a single return) to a separate return (husband filing a return and wife filing a return) or vice versa, or who changed their residence from one State to another during the taxpayer accounting period, may have had their returns classified in more than one State.

Preliminary Data" article published in the SOI Spring Bulletin. For further explanation of the tax terms, refer to the "Individual Income Tax Returns, Publication 1304.

* Data for Tax Year 2008 includes returns that were filed by individuals who in fiscal file extension, advance payment and late back or other returns in this Title may affect the data for various items shown in the table such as the total number of returns filed (including joint and paper returns), number of returns with deductions, and the amount of deductions taken thereon.
(1) Includes returns with adjusted gross deficit.
(2) Includes, for example, returns filed from Army Post Office and Fleet Post Office addresses by members of the armed forces stationed overseas; returns filed from Puerto Rico by bona fide residents of Puerto Rico with income from sources outside Puerto Rico or with income exempt as U.S. government employees.
Table shows taxes allowed as an itemized deduction from adjusted gross income, including personal property taxes, state and local income taxes, general sales taxes (for returns filed electronically), and real estate taxes. Taxes paid on property connected with a trade or business are not included because these items are deducted in arriving at adjusted gross income.
Net income taxes include those for corporations that elected to increase the size of the property.
Data are based on a sample of returns filed during calendar year 2009 and processed during calendar year 2010. For 1998 (same-year) Earned Tax Credit, including any returns filed for tax years preceding 2009.
Because of the complexity of the tax processing, taxpayer reporting discrepancies are corrected only to the extent necessary to verify the income tax liability reported. Most of the other corrections in the taxpayer records used for these statistics could not be made because of time and resource constraints. The statistics in this table should, therefore, be used with the knowledge that some of the data have not been perfected or edited for statistical purposes and that they may contain errors. Also, the statistics are based on returns processed in U.S. banks or other tellers, as a result, they vary between a. above for differences in tax return coverage, and b. above U.S. totals in this table.
Classification by State was usually based on the taxpayer's home address. However, some taxpayers may have used the address of a tax lawyer, or accountant, or the business address of a place of business. Instead, such addresses could have been found incorrect or blank other than the State in which the taxpayer resided.
For explanation of the tax law changes which could affect the year-to-year analysis of data, refer to the explanation and "Individual Income Tax Returns," Publication 1304, Statistics of Income Publications, Internal Revenue Service. For a description of the sample design, see "Individual Income Tax Returns," Publication 1304, Statistics of Income Publications, Internal Revenue Service.

* Apache Pass Inn was DNF. Includes returns that were filed by individuals who to discuss the economic stimulus payment and who had no other reason to file. This may affect the data for various items shown in the table such as the total number of returns filed (including joint and paper preparer returns), number of exemptions, salaries and wages, and adjusted gross income.

(1) Includes returns with no adjusted gross income.

(2) Includes, for example, returns filed forms Post Office and Penn Post Office addresses by residents of the armed forces stationed overseas, returns filed by either U.S. citizens abroad, and returns filed by residents of Puerto Rico with income from sources outside Puerto Rico or with income earned as U.S. government employees.

Table entries taken allowed as an itemized deduction from adjusted gross income, including personal property taxes, state and local income taxes or general sales taxes, taxes paid to foreign countries on U.S. possessions (unless a foreign tax credit was claimed), and real estate taxes except those levied for improvements that tended to increase the value of property.

NOTES: This table presents aggregates of all returns filed and processed through the Individual Master File (IMF) system during Calendar Year 2008, including any returns filed for tax years preceding 2007.

Due to the inherent complexity of the return processing, taxpayer reporting discrepancies are corrected only to the extent necessary to verify the income tax liability reported. Most of the other corrections to the taxpayer records used for these statistics could not be made because of time and resource constraints. The statistics in this table should, therefore, be used with the knowledge that some of the data have not been perfected or edited for statistical purposes and that corrections to the data, if made, could significantly change the statistics. For more information, see the publication, *SOI Publication 1304, Individual Income Tax Returns*.

Coverage, which affects U.S. totals in this table,

Data for returns filed by taxpayers with addresses in foreign countries or military APO or FPO addresses are tabulated in separate records. Returns filed by taxpayers with addresses in foreign countries may have used the address of a tax preparer, or accountant, in the address of a place of business; moreover, such addresses could each have been located in a State other than the State in which the taxpayer resided.

For explanations of the tax law changes which could affect the year-to-year analysis of data, refer to the respective years' Individual Income Tax Returns, Preliminary Data* article published in the SOI Spring Bulletin. For further explanation of the tax terms, refer to the Individual Income Tax Returns, *Publication 1304, *SOURCE: IRS, Statistics of Income Division, Individual Master File System, May 2009, and Tax Policy Center calculations.*

(1) Includes returns with adjusted gross deficit.
(2) U.S. totals include (a) substitute for returns, whereby the Internal Revenue Service constructs returns for certain nonfilers on the basis of an estimation and imposes an income tax on the resulting estimate of the tax base, i.e. "taxable income," and (b) returns of nonresident or dispairing aliens.
(3) Includes Puerto Rico, Virgin Islands, Guam, and Foreign. Data for Puerto Rico are limited to returns of bona fide residents of Puerto Rico filed by other U.S. citizens abroad, and returns filed by residents of Puerto Rico with income from sources outside Puerto Rico or with income earned as U. S. government employees.

Table shows taxes allowed as an itemized deduction from adjusted gross income, including personal property taxes, state and local income taxes or general sales taxes, taxes paid to foreign countries or U.S. possessions (unless a foreign tax credit was claimed), and real estate taxes except those levied for local benefits which increase the value of the property.

NOTES: This table presents aggregates of all returns filed and processed through the Individual Master File (IMF) system during Calendar Year 2007, including any returns filed for tax years preceding 2006.

Due to the time required for return filing and processing, taxpayer reporting discrepancies are corrected only to the extent necessary to verify the income tax liability reported. Most of the other corrections to the taxpayer records used for these statistics could not be made because of time and resource constraints. The statistics in Table 2 should, therefore, be used with the knowledge that some of the data have not been perfected or edited for statistical purposes and that Table 2 does not fully reflect the taxpayer compliance measurable in U.S. trade or Tables 3 and 5, as a result. Also, see footnote 2, above for IRS'services in tax return coverage, which affects U.S. totals in this table.
Classification by State was usually based on the taxpayer's home address. However, some taxpayers may have used the address of a tax lawyer, or accountant, or the business address of a place of business; moreover, such addresses could each have been located in a State other than the State in which the taxpayer resided.
For explanation of the tax law changes which could affect the year-to-year analysis of data, refer to the respective years' 'Individual Income Tax Returns, Preliminary Data' article published in the SOI Bulletin. For further explanation of the tax terms, refer to the 'Individual Income Tax Returns,' Publication 1304.

(1) Includes returns with adjusted gross deficit.
(2) Includes, for example, returns filed from Army Post Offices and Fleet Post Offices addresses by members of the armed forces stationed overseas; returns filed by other U.S. citizens abroad; and returns filed by residents of Puerto Rico with income from sources outside Puerto Rico or with income earned as U.S. government employees.

Table shows taxes allowed as an itemized deduction from adjusted gross income, including personal property taxes, state and local income taxes or general sales taxes, and real estate taxes. Taxes paid to foreign countries (unless a foreign tax credit was claimed), and real estate taxes except those levied for improvements that tended to increase the value of the property.

NOTE: This table presents aggregates of all returns filed and processed through the Individual Master File (IMF) system during Calendar Year 2006, including any returns filed for prior tax years.
In general, during administration of Master File processing, taxpayer reporting discrepancies are corrected only to the extent necessary to verify the income tax liability reported. Most of the other corrections to the taxpayer records used for these statistics could not be made because of time and resource constraints. Therefore, the State in which a return is filed may not be the taxpayer's actual residence. Also, the sum of State data may not equal the U.S. totals because the sum of the U.S. totals in this table may not be altogether comparable to U.S. totals in Tables 1 and 3, as a result. Also, see footnote 2, above.For differences in tax return coverage, which affects U.S. totals in this table.
Data are based on the address listed on the taxpayer's home address. However, some taxpayers may have used the address of a tax lawyer, or accountant, or the address of a place of business; moreover, such addresses could each have been located in a State other than the State in which the taxpay er resided.
For discussion of the tax law changes which could affect the year-to-year analysis of data, refer to the respective years' 'Individual Income Tax Returns, Preliminary Data' article published in the SOI Winter Bulletin. For further explanations of the tax terms, refer to the 'Individual Income Tax Returns,' Publication 1304.

(1) Includes returns with adjusted gross deficit.
(2) Includes, for example, returns filed from Army Post Offices and Fleet Post Offices addresses by members of the armed forces stationed overseas; returns filed by other U.S. citizens abroad; and returns filed by residents of Puerto Rico with income from sources outside Puerto Rico or with income earned as U.S. government employees.

Table shows taxes allowed as an itemized deduction from adjusted gross income, including personal property taxes, state and local income taxes or general sales taxes, and real estate taxes. Taxes paid on property to be held for investment (unless a foreign tax credit was claimed), and real estate taxes except those levied for improvements that tended to increase the value of the property.

NOTE: This table presents aggregates of all returns filed and processed through the Individual Master File (IMF) system during Calendar Year 2005, including any returns filed late for Tax Year 2004.
In general, during administration of Master File processing, taxpayer reporting discrepancies are corrected only the extent necessary to verify the income tax liability reported. Most of the other corrections to the taxpayer records used for these statistics could not be made because of time and resource constraints. Therefore, the data in this table may not be entirely consistent with the data in Table 1 and Table 2. Also, the data in this table may not be entirely consistent with the U.S. totals in this table may not be altogether comparable to U.S. totals in Tables 1 and 2, as a result. Also, see footnote 2, above.For differences in tax return coverage, which affects U.S. totals in this table.
Data are based on the address on the taxpayer's home address. However, some taxpayers may have used the address of a tax lawyer or accountant, or the address of a place of business; moreover, such addresses could each have been located in a State other than the State in which the taxpay er resided.
For information about the tax law changes which could affect the year-to-year analysis of data, refer to the respective years' 'Individual Income Tax Returns, Preliminary Data' article published in the SOI Winter Bulletin. For further explanations of the tax terms, refer to the 'Individual Income Tax Returns,' Publication 1304.

(1) Includes returns with adjusted gross deficit.
(2) Includes, for example, returns filed from Army Post Offices and Fleet Post Offices addresses by members of the armed forces stationed overseas, returns filed by other U.S. citizens abroad, and returns filed by residents of Puerto Rico with income from sources outside Puerto Rico or with income earned as U.S. Government employees.

Table shows taxes allowed as an itemized deduction from adjusted gross income, including personal property taxes, state and local income taxes or general sales taxes, taxes paid to foreign countries or U.S. possessions (unless a foreign tax credit was claimed), and real estate taxes except those levied for improvements that tended to increase the value of property.

NOTE: The data presents aggregates of all returns filed and processed through the Individual Master File (IMF) system during Calendar Year 2004, including any returns filed for tax years preceding 2003.

Due to the nature of IMF operations or Master File processing, taxpayer reporting discrepancies are corrected only to the extent necessary to verify the income tax liability reported. Most of the other corrections to the taxpayer records used for these statistics could not be made because of time and resource constraints. The statistics in Table 2 should, therefore, be used with the knowledge that some of the data have not been perfected or edited for statistical purposes and that U.S. totals in this table may not be altogether consistent with U.S. totals in other tables. Data for the "Other Areas" were tabulated from returns filed by taxpayers with APO or FPO addresses. Data for "Unknown" Classification by State was usually based on the taxpayer's home address. However, some taxpayers may have used the address of a tax lawyer or accountant or the address of a place of business; moreover, such addresses could each have been located in a State other than the State in which the taxpayer resided.
