Number of AMT Taxpayers (millions). Baseline: 0.2

Proposal: 0.2

\* Non-zero value rounded to zero; \*\* Insufficient data

(1) Calendar year. Baseline is current law as of December 21, 2022. Table shows the combined tax benefit of the Child Tax Credit (CTC), Child and Dependent Care Tax Credit (CDCTC), and the Earned Income Tax Credit (EITC). The benefit of the CTC includes both the partially refundable credit of up to \$2,000 for eligible children under the age of 17 and the non-refundable credit of up to \$500 for other eligible dependents. The benefit of the CDCTC does not include any potential interaction with Dependent Care Flexible Spending Arrangements. For more information on TPC's baseline definitions, see

<http://www.taxpolicycenter.org/taxtopics/Baseline-Definitions.cfm>

(2) Includes both filing and non-filing units but excludes those that are dependents of other tax units. Tax units with negative adjusted gross income are excluded from their respective income class but are included in the totals. For a description of expanded cash income, see

<http://www.taxpolicycenter.org/TaxModel/income.cfm>

(3) Tax units with benefit are tax units with a net benefit of \$10 or more.

(4) After-tax income is expanded cash income less: individual income tax net of refundable credits; corporate income tax; payroll taxes (Social Security and Medicare); estate tax; and excise taxes.

(5) For income categories for which the baseline tax burden is negative, a negative value for the tax benefit as a percent of federal tax indicates a net increase in federal subsidies, and a positive value indicates a net decrease in federal subsidies.

(6) Average federal tax (includes individual and corporate income tax, payroll taxes for Social Security and Medicare, the estate tax, and excise taxes) as a percentage of average expanded cash income.

(1) Calendar year. Baseline is current law as of December 21, 2022. Table shows the combined tax benefit of the Child Tax Credit (CTC), Child and Dependent Care Tax Credit (CDCTC), and the Earned Income Tax Credit (EITC). The benefit of the CTC includes both the partially refundable credit of up to \$2,000 for eligible children under the age of 17 and the non-refundable credit of up to \$500 for other eligible dependents. The benefit of the CDCTC does not include any potential interaction with Dependent Care Flexible Spending Arrangements. For more information on TPC's baseline definitions, see <http://www.taxpolicycenter.org/taxtopics/Baseline-Definitions.cfm>

(2) Includes both filing and non-filing units but excludes those that are dependents of other tax units. Tax units with negative adjusted gross income are excluded from their respective income class but are included in the totals. For a description of expanded cash income, see <http://www.taxpolicycenter.org/TaxModel/income.cfm>

(3) Tax units with benefit are tax units with a net benefit of \$10 or more.

(4) After-tax income is expanded cash income less: individual income tax net of refundable credits; corporate income tax; payroll taxes (Social Security and Medicare); estate tax; and excise taxes.

(5) For income categories for which the baseline tax burden is negative, a negative value for the tax benefit as a percent of federal tax indicates a net increase in federal subsidies, and a positive value indicates a net decrease in federal subsidies.

(6) Average federal tax (includes individual and corporate income tax, payroll taxes for Social Security and Medicare, the estate tax, and excise taxes) as a percentage of average expanded cash income.
