Proposal: 0.1

* Non-zero value rounded to zero; ** Insufficient data

(1) Calendar year. Baseline is the law currently in place as of October 26, 2020. Proposal would remove the upper age limit (65 under current law) for the childless EITC.

We assume that 50% of current law non-filing childless earners would begin filing to take the expanded the EITC, rising to 60% by 2025; EITC takeup among single filers with no children would increase to 70.2% in 2020 (91% by 2024); and EITC takeup among married filers with no children would increase to 74.2% in 2020 (79% by 2024.)

These tables were revised to correct an error that increased take-up of the EITC among tax units with filers under age 65.

<http://www.taxpolicycenter.org/taxtopics/Baseline-Definitions.cfm>

(2) Includes both filing and non-filing units but excludes those that are dependents of other tax units. Tax units with negative adjusted gross income are excluded from their respective income class but are included in the totals. For a description of expanded cash income, see

<http://www.taxpolicycenter.org/TaxModel/income.cfm>

(3) The income percentile classes used in this table are based on the income distribution for the entire population and contain an equal number of people, not tax units. The breaks are (in 2019 dollars): 20% \$24,500; 40% \$49,100; 60% \$87,700; 80% \$158,100; 90% \$231,800; 95% \$328,700; 99% \$768,800; 99.9% \$3,364,100.

(4) Includes tax units with a change in federal tax burden of \$10 or more in absolute value.

(5) After-tax income is expanded cash income less: individual income tax net of refundable credits; corporate income tax; payroll taxes (Social Security and Medicare); estate tax; and excise taxes.

(6) Average federal tax (includes individual and corporate income tax, payroll taxes for Social Security and Medicare, the estate tax, and excise taxes) as a percentage of average expanded cash income.

* Non-zero value rounded to zero; ** Insufficient data

(1) Calendar year. Baseline is the law currently in place as of October 26, 2020. Proposal would remove the upper age limit (65 under current law) for the childless EITC. We assume that 50% of current law non-filing childless earners would begin filing to take the expanded the EITC, rising to 60% by 2025; EITC takeup among single filers with no children would increase to 70.2% in 2020 (91% by 2024); and EITC takeup among married filers with no children would increase to 74.2% in 2020 (79% by 2024.) These tables were revised to correct an error that increased take-up of the EITC among tax units with filers under age 65.

<http://www.taxpolicycenter.org/taxtopics/Baseline-Definitions.cfm>

(2) Includes both filing and non-filing units but excludes those that are dependents of other tax units. Tax units with negative adjusted gross income are excluded from their respective income class but are included in the totals. For a description of expanded cash income, see

<http://www.taxpolicycenter.org/TaxModel/income.cfm>

(3) The income percentile classes used in this table are based on the income distribution for the entire population and contain an equal number of people, not tax units. The incomes used are adjusted for family size by dividing by the square root of the number of people in the tax unit. The resulting percentile breaks are (in 2019 dollars): 20% \$17,000; 40% \$33,500; 60% \$57,500; 80% \$96,800; 90% \$140,100; 95% \$196,200; 99% \$445,600; 99.9% \$1,933,800.

(4) Includes tax units with a change in federal tax burden of \$10 or more in absolute value.

(5) After-tax income is expanded cash income less: individual income tax net of refundable credits; corporate income tax; payroll taxes (Social Security and Medicare); estate tax; and excise taxes.

(6) Average federal tax (includes individual and corporate income tax, payroll taxes for Social Security and Medicare, the estate tax, and excise taxes) as a percentage of average expanded cash income.
