Source: Urban-Brookings Tax Policy Center Microsimulation Model (version 1006-1).

(1) Calendar year. Baseline is pre-EGTRRA law. Tax cuts include individual income and estate tax provisions in EGTRRA, JCWA, JGTRRA, WFTRA, AJCA, TIPRA, and PPA. Proportional financing requires an additional levy of 2.3 percent of cash income on all tax units.

(2) Tax units with negative cash income are excluded from the lowest quintile but are included in the totals. For a description of cash income, see <http://www.taxpolicycenter.org/TaxModel/income.cfm>

(3) Includes both filing and non-filing units. Tax units that are dependents of other taxpayers are excluded from the analysis.

(4) After-tax income is cash income less: individual income tax net of refundable credits; corporate income tax; payroll taxes (Social Security and Medicare); and estate tax.

(5) Average federal tax (includes individual and corporate income tax, payroll taxes for Social Security and Medicare, and the estate tax) as a percentage of average cash income.
