Source: Urban-Brookings Tax Policy Center Microsimulation Model (version 1006-1).

Number of AMT Taxpayers (millions). Baseline: 8.1 Proposal: 3.5

(1) Calendar year. Baseline is pre-EGTRRA law. Tax cuts include individual income and estate tax provisions in EGTRRA, JCWA, JGTRRA, WFTRA, AJCA, TIPRA, and PPA. Lump sum financing requires an additional levy of \$1,628 on each tax unit.

(2) Tax units with negative cash income are excluded from the lowest income class but are included in the totals. For a description of cash income, see

<http://www.taxpolicycenter.org/TaxModel/income.cfm>

(3) For the income levels at each quintile and the top income percentiles used in this table, see

<http://www.taxpolicycenter.org/TaxModel/percentiles.cfm>

(4) Includes both filing and non-filing units. Tax units that are dependents of other taxpayers are excluded from the analysis.

(5) After-tax income is cash income less: individual income tax net of refundable credits; corporate income tax; payroll taxes (Social Security and Medicare); and estate tax.

(6) Average federal tax (includes individual and corporate income tax, payroll taxes for Social Security and Medicare, and the estate tax) as a percentage of average cash income.
