(1) Calendar year. Baseline is current law with no individual AMT. Proposal replaces the current individual income tax with the Republican Study Committee's alternative tax system as described in H.R. 3818, with the exception that gross income is replaced by total income in the determination of the tax base. The alternative tax denies adjustments to income, itemized deductions, and tax credits; has a standard deduction of $\$ 12,500$ ( $\$ 25,000$ for joint returns) and personal exemptions of $\$ 3,500$; and has rates of $10 \%$ up to $\$ 50,000(\$ 100,000$ for joint returns) and $25 \%$ above that level. The preferential rates on capital gains and dividends are retained in the alternative tax.
(2) Tax units with negative cash income are excluded from the lowest income class but are included in the totals. For a description of cash income, see http://www.taxpolicycenter.org/TaxModel/income.cfm
(3) The cash income percentile breaks used in this table are (in 2006 dollars): $20 \%$ \$13,944, $40 \%$ \$26,887, $60 \% \$ 47,151,80 \% ~ \$ 83,902,90 \% ~ \$ 123,792,95 \%$ \$174,283, 99\% \$425,614, 99.5\% \$663,650, and 99.9\% 1,925,007.
(4) Includes both filing and non-filing units but excludes those that are dependents of other tax units.
(5) After-tax income is cash income less: individual income tax net of refundable credits; corporate income tax; payroll taxes (Social Security and Medicare); and estate tax.
(6) Average federal tax (includes individual and corporate income tax, payroll taxes for Social Security and Medicare, and the estate tax) as a percentage of average cash income.
