Source: Urban-Brookings Tax Policy Center Microsimulation Model (version 0308-7).

<sup>(1)</sup> Estimates are static and do not account for any potential microeconomic behavioral response. Official estimates from the Joint Committee on Taxation would likely show a somewhat different effect on revenue.

<sup>(2)</sup> Baseline is current law with a reduced threshold of \$6,000. Proposal reduces the unindexed earnings refundability threshold to \$0, effective 1/1/09.

<sup>(3)</sup> Fiscal-year revenue numbers assume a 20-80 split. The actual effect on receipts could differ.
