(1) Calendar year. Baseline is current law. Proposal reduced the unindexed earnings threshold for refundability to \$8,100. Estimates are static and do not account for any potential microeconomic behavioral response. Official estimates from the Joint Committee on Taxation would likely show a somewhat different effect on revenue. Average benefits are suppressed for income classes in which fewer than 5,000 tax units have a reduction in tax liability.

(2) Tax units with negative cash income are excluded from the lowest income class but are included in the totals. For a description of cash income, see

<http://www.taxpolicycenter.org/TaxModel/income.cfm>

(3) Includes both filing and non-filing units but excludes those that are dependents of other tax units.
