(1) Data are for calendar year 2010. Tax cuts are calculated as a comparison of pre-EGTRRA law without the AMT and current law without the AMT. The share of the tax cuts taken back by the AMT is calculated using the increase in the AMT between pre-EGTRRA law and current law.

(2) Tax units with negative cash income are excluded from the lowest income class but are included in the totals. For a description of cash income, see

<http://www.taxpolicycenter.org/TaxModel/income.cfm>

(3) Includes both filing and non-filing units. Tax units that are dependents of other taxpayers are excluded from the analysis.
