Source: Urban-Brookings Tax Policy Center Microsimulation Model (version 0509-1).

Number of AMT Taxpayers (millions). Baseline: 5.1

Proposal: 4.9

- (2) Tax units with negative cash income are excluded from the lowest income class but are included in the totals. For a description of cash income, see http://www.taxpolicycenter.org/TaxModel/income.cfm
- (3) The cash income percentile classes used in this table are based on the income distribution for the entire population and contain an equal number of people, not tax units. The breaks are (in 2009 dollars): 20% \$19,429, 40% \$37,634, 60% \$65,903, 80% \$112,079, 90% \$162,348, 95% \$227,254, 99% \$601,435, 99.9% \$2,737,383.
- (4) Includes both filing and non-filing units but excludes those that are dependents of other tax units.
- (5) After-tax income is cash income less: individual income tax net of refundable credits; corporate income tax; payroll taxes (Social Security and Medicare); and estate tax
- (6) Average federal tax (includes individual and corporate income tax, payroll taxes for Social Security and Medicare, and the estate tax) as a percentage of average cash income.

⁽¹⁾ Calendar year. Administration baseline extends the 2009 AMT patch and indexes the AMT exemption, rate bracket threshold, and phaseout exemption threshold for inflation; makes the 2001 and 2003 individual income tax cuts permanent and makes 2009 estate tax law permanent. Proposal would increase regular income tax liability before credits by the value of itemized deductions, net of any Pease limitation, multiplied by the difference, if positive, between the taxpayer's statutory marginal rate and 28 percent. For AMT purposes, AMT liability, if positive, would be increased by the value of itemized deductions excluding those for state and local taxes, medical expenses, and miscellaneous deductions subject to the 2 percent of AGI floor multiplied by the difference, if positive, between the taxpayer's statutory marginal rate and 28 percent.

Number of AMT Taxpayers (millions). Baseline: 5.1 Proposal:

(1) Calendar year. Administration baseline extends the 2009 AMT patch and indexes the AMT exemption, rate bracket threshold, and phaseout exemption threshold for inflation; makes the 2001 and 2003 individual income tax cuts permanent and makes 2009 estate tax law permanent. Proposal would increase regular income tax liability before credits by the value of itemized deductions, net of any Pease limitation, multiplied by the difference, if positive, between the taxpayer's statutory marginal rate and 28 percent. For AMT purposes, AMT liability, if positive, would be increased by the value of itemized deductions excluding those for state and local taxes, medical expenses, and miscellaneous deductions subject to the 2 percent of AGI floor multiplied by the difference, if positive, between the taxpayer's statutory marginal rate and 28 percent.

(2) Tax units with negative cash income are excluded from the lowest income class but are included in the totals. For a description of cash income, see

http://www.taxpolicycenter.org/TaxModel/income.cfm

(3) The cash income percentile classes used in this table are based on the income distribution for the entire population and contain an equal number of people, not tax units. The incomes used are adjusted for family size by dividing by the square root of the number of people in the tax unit. The resulting percentile breaks are (in 2009 dollars): 20% \$13,268,40% \$24,875,60% \$42,021,80% \$68,444, 90% \$98,198, 95% \$139,231, 99% \$363,345, 99.9% \$1,276,757.

(4) Includes both filing and non-filing units but excludes those that are dependents of other tax units.

(5) After-tax income is cash income less: individual income tax net of refundable credits; corporate income tax; payroll taxes (Social Security and Medicare); and estate tax.

(6) Average federal tax (includes individual and corporate income tax, payroll taxes for Social Security and Medicare, and the estate tax) as a percentage of average cash income.

⁽¹⁾ Calendar year. Administration baseline extends the 2009 AMT patch and indexes the AMT exemption, rate bracket threshold, and phaseout exemption threshold for inflation; makes the 2001 and 2003 individual income tax cuts permanent and makes 2009 estate tax law permanent. Proposal would increase regular income tax liability before credits by the value of itemized deductions, net of any Pease limitation, multiplied by the difference, if positive, between the taxpayer's statutory marginal rate and 28 percent. For AMT purposes, AMT liability, if positive, would be increased by the value of itemized deductions excluding those for state and local taxes, medical expenses, and miscellaneous deductions subject to the 2 percent of AGI floor multiplied by the difference, if positive, between the taxpayer's statutory marginal rate and 28 percent.

⁽²⁾ Tax units with negative cash income are excluded from the lowest income class but are included in the totals. For a description of cash income, see

⁽³⁾ The cash income percentile classes used in this table are based on the income distribution for the entire population and contain an equal number of people, not tax units. The incomes used are adjusted for family size by dividing by the square root of the number of people in the tax unit. The resulting percentile breaks are (in 2009 dollars): 20% \$13,268, 40% \$24,875, 60% \$42,021, 80% \$68,444, 90% \$98,198, 95% \$139,231, 99% \$363,345, 99.9% \$1,676,752.

⁽⁴⁾ Includes both filing and non-filing units but excludes those that are dependents of other tax units.

⁽⁵⁾ After-tax income is cash income less: individual income tax net of refundable credits; corporate income tax; payroll taxes (Social Security and Medicare); and estate tax.

⁽⁶⁾ Average federal tax (includes individual and corporate income tax, payroll taxes for Social Security and Medicare, and the estate tax) as a percentage of average cash income.

Source: Urban-Brookings Tax Policy Center Microsimulation Model (version 0509-1).

⁽¹⁾ Calendar year. Administration baseline extends the 2009 AMT patch and indexes the AMT exemption, rate bracket threshold, and phaseout exemption threshold for inflation; makes the 2001 and 2003 individual income tax cuts permanent and makes 2009 estate tax law permanent. Proposal would increase regular income tax liability before credits by the value of itemized deductions, net of any Pease limitation, multiplied by the difference, if positive, between the taxpayer's statutory marginal rate and 28 percent. For AMT purposes, AMT liability, if positive, would be increased by the value of itemized deductions excluding those for state and local taxes, medical expenses, and miscellaneous deductions subject to the 2 percent of AGI floor multiplied by the difference, if positive, between the taxpayer's statutory marginal rate and 28 percent.

⁽²⁾ Tax units with negative cash income are excluded from the lowest income class but are included in the totals. For a description of cash income, see

⁽³⁾ The cash income percentile classes used in this table are based on the income distribution for the entire population and contain an equal number of people, not tax units. The incomes used are adjusted for family size by dividing by the square root of the number of people in the tax unit. The resulting percentile breaks are (in 2009 dollars): 20% \$13,268, 40% \$24,875, 60% \$42,021, 80% \$68,444, 90% \$98,198, 95% \$139,231, 99% \$363,345, 99.9% \$1,676,752.

⁽⁴⁾ Includes both filing and non-filing units but excludes those that are dependents of other tax units.

⁽⁵⁾ After-tax income is cash income less: individual income tax net of refundable credits; corporate income tax; payroll taxes (Social Security and Medicare); and estate tax.

⁽⁶⁾ Average federal tax (includes individual and corporate income tax, payroll taxes for Social Security and Medicare, and the estate tax) as a percentage of average cash income.

Source: Urban-Brookings Tax Policy Center Microsimulation Model (version 0509-1).

Note: Elderly tax units are those with either head or spouse (if filing jointly) age 65 or older.

⁽¹⁾ Calendar year. Administration baseline extends the 2009 AMT patch and indexes the AMT exemption, rate bracket threshold, and phaseout exemption threshold for inflation; makes the 2001 and 2003 individual income tax cuts permanent and makes 2009 estate tax law permanent. Proposal would increase regular income tax liability before credits by the value of itemized deductions, net of any Pease limitation, multiplied by the difference, if positive, between the taxpayer's statutory marginal rate and 28 percent. For AMT purposes, AMT liability, if positive, would be increased by the value of itemized deductions excluding those for state and local taxes, medical expenses, and miscellaneous deductions subject to the 2 percent of AGI floor multiplied by the difference, if positive, between the taxpayer's statutory marginal rate and 28 percent.

⁽²⁾ Tax units with negative cash income are excluded from the lowest income class but are included in the totals. For a description of cash income, see

⁽³⁾ The cash income percentile classes used in this table are based on the income distribution for the entire population and contain an equal number of people, not tax units. The incomes used are adjusted for family size by dividing by the square root of the number of people in the tax unit. The resulting percentile breaks are (in 2009 dollars): 20% \$13,268, 40% \$24,875, 60% \$42,021, 80% \$68,444, 90% \$98,198, 95% \$139,231, 99% \$363,345, 99.9% \$1,676,752.

⁽⁴⁾ Includes both filing and non-filing units but excludes those that are dependents of other tax units.

⁽⁵⁾ After-tax income is cash income less: individual income tax net of refundable credits; corporate income tax; payroll taxes (Social Security and Medicare); and estate tax.

⁽⁶⁾ Average federal tax (includes individual and corporate income tax, payroll taxes for Social Security and Medicare, and the estate tax) as a percentage of average cash income.
