Number of AMT Taxpayers (millions). Baseline: 4.9

Proposal: 7.6

(1) Calendar year. Baseline is the Administration's baseline (extends all of the individual income tax provisions included in 2001 EGTRRA and 2003 JGTRRA; maintains the estate tax at its 2009 parameters; extends the 2009 AMT Patch and indexes the AMT exemption, rate bracket threshold, and phase-out exemption threshold for inflation). Proposal removes tax preferences for savings; pension distribution are not taxed, there are no tax-free contributions to IRAs or other retirement plans, there are no ROTH, Keogh, SEP or SIMPLE accounts, and the buildup of retirement assets in defined contribution and defined benefit plans are taxed. Proposal lowers all regular and AMT statutory rates by a revenue neutral 3.12 percentage points.

(2) Tax units with negative cash income are excluded from the lowest income class but are included in the totals. For a description of cash income, see <http://www.taxpolicycenter.org/TaxModel/income.cfm>

(3) The cash income percentile classes used in this table are based on the income distribution for the entire population and contain an equal number of people, not tax units. The breaks are (in 2009 dollars): 20% \$19,957, 40% \$37,919, 60% \$66,635, 80% \$111,847, 90% \$160,851, 95% \$224,521, 99% \$590,626, 99.9% \$2,706,134.

(4) Includes both filing and non-filing units but excludes those that are dependents of other tax units.

(5) After-tax income is cash income less: individual income tax net of refundable credits; corporate income tax; payroll taxes (Social Security and Medicare); and estate tax.

(6) Average federal tax (includes individual and corporate income tax, payroll taxes for Social Security and Medicare, and the estate tax) as a percentage of average cash income.

Source: Urban-Brookings Tax Policy Center Microsimulation Model (version 0509-2).

(1) Calendar year. Baseline is the Administration's baseline (extends all of the individual income tax provisions included in 2001 EGTRRA and 2003 JGTRRA; maintains the estate tax at its 2009 parameters; extends the 2009 AMT Patch and indexes the AMT exemption, rate bracket threshold, and phase-out exemption threshold for inflation). Proposal removes tax preferences for savings; pension distribution are not taxed, there are no tax-free contributions to IRAs or other retirement plans, there are no ROTH, Keogh, SEP or SIMPLE accounts, and the buildup of retirement assets in defined contribution and defined benefit plans are taxed. Proposal lowers all regular and AMT statutory rates by a revenue neutral 3.12 percentage points.

(2) Tax units with negative cash income are excluded from the lowest income class but are included in the totals. For a description of cash income, see

<http://www.taxpolicycenter.org/TaxModel/income.cfm>

(3) The cash income percentile classes used in this table are based on the income distribution for the entire population and contain an equal number of people, not tax units. The incomes used are adjusted for family size by dividing by the square root of the number of people in the tax unit. The resulting percentile breaks are (in 2009 dollars): 20% \$13,636, 40% \$25,075, 60% \$42,597, 80% \$68,949, 90% \$98,059, 95% \$138,184, 99% \$356,154, 99.9% \$1,639,811.

(4) Includes both filing and non-filing units but excludes those that are dependents of other tax units.

(5) After-tax income is cash income less: individual income tax net of refundable credits; corporate income tax; payroll taxes (Social Security and Medicare); and estate tax.

(6) Average federal tax (includes individual and corporate income tax, payroll taxes for Social Security and Medicare, and the estate tax) as a percentage of average cash income.
