Source: Urban-Brookings Tax Policy Center Microsimulation Model (version 0309-2).

Number of AMT Taxpayers (millions). Baseline: 4.9

Proposal: 5.9

(1) Calendar year. Baseline is the Administration's baseline (extends all of the individual income tax provisions included in 2001 EGTRRA and 2003 JGTRRA; maintains the estate tax at its 2009 parameters; extends the 2009 AMT Patch and indexes the AMT exemption, rate bracket threshold, and phase-out exemption threshold for inflation). Proposal removes tax preferences for new savings; there are no tax-free contributions to IRAs or other retirement plans, there are no ROTH, Keogh, SEP or SIMPLE accounts, and accruals in defined benefit plans are taxed. Proposal provides a revenue neutral, fully refundable credit to all taxpayers. The credit is equal to \$875 (\$1,750 for married couples) increased by \$437.5 for each dependent under age 17.

(2) Tax units with negative cash income are excluded from the lowest income class but are included in the totals. For a description of cash income, see <http://www.taxpolicycenter.org/TaxModel/income.cfm>

(3) Includes both filing and non-filing units but excludes those that are dependents of other tax units.

(4) After-tax income is cash income less: individual income tax net of refundable credits; corporate income tax; payroll taxes (Social Security and Medicare); and estate tax.

(5) Average federal tax (includes individual and corporate income tax, payroll taxes for Social Security and Medicare, and the estate tax) as a percentage of average cash income.

(1) Calendar year. Baseline is the Administration's baseline (extends all of the individual income tax provisions included in 2001 EGTRRA and 2003 JGTRRA; maintains the estate tax at its 2009 parameters; extends the 2009 AMT Patch and indexes the AMT exemption, rate bracket threshold, and phase-out exemption threshold for inflation). Proposal removes tax preferences for new savings; there are no tax-free contributions to IRAs or other retirement plans, there are no ROTH, Keogh, SEP or SIMPLE accounts, and accruals in defined benefit plans are taxed. Proposal provides a revenue neutral, fully refundable credit to all taxpayers. The credit is equal to \$875 (\$1,750 for married couples) increased by \$437.5 for each dependent under age 17.

(2) Tax units with negative cash income are excluded from the lowest income class but are included in the totals. For a description of cash income, see

<http://www.taxpolicycenter.org/TaxModel/income.cfm>

(3) Includes both filing and non-filing units but excludes those that are dependents of other tax units.

(4) After-tax income is cash income less: individual income tax net of refundable credits; corporate income tax; payroll taxes (Social Security and Medicare); and estate tax.

(5) Average federal tax (includes individual and corporate income tax, payroll taxes for Social Security and Medicare, and the estate tax) as a percentage of average cash income.
