Source: Urban-Brookings Tax Policy Center Microsimulation Model (version 0509-4).
Number of AMT Taxpayers (millions). Baseline: 21.0

## Proposal: 21.0

(1) Calendar year. Baseline is current law. Proposal would impose an additional $0.9 \%$ tax on earnings as defined for purposes of the Hospital Insurance Tax plus investment income. Investment income would include taxable interest, dividends, net positive capital gains, net positive income from estates and trusts, net positive income from rents, and net positive income from royalties. Tax would be imposed on earnings plus investment income in excess of $\$ 200,000$ ( $\$ 250,000$ for married couples filing a joint return). The threshold would not be indexed for inflation.
(2) Tax units with negative cash income are excluded from the lowest income class but are included in the totals. For a description of cash income, see http://www.taxpolicycenter.org/TaxModel/income.cfm
(3) The cash income percentile classes used in this table are based on the income distribution for the entire population and contain an equal number of people, not tax units. The breaks are (in 2009 dollars): $20 \%$ \$19,599, $40 \% ~ \$ 37,843,60 \% ~ \$ 66,647,80 \% ~ \$ 113,886,90 \% ~ \$ 164,974,95 \% ~ \$ 231,179,99 \% ~ \$ 624,396,99.9 \% ~ \$ 2,875,812$.
(4) Includes both filing and non-filing units but excludes those that are dependents of other tax units.
(5) After-tax income is cash income less: individual income tax net of refundable credits; corporate income tax; payroll taxes (Social Security and Medicare); and estate tax.
(6) Average federal tax (includes individual and corporate income tax, payroll taxes for Social Security and Medicare, and the estate tax) as a percentage of average cash income.

Proposal: 21.0
(1) Calendar year. Baseline is current law. Proposal would impose an additional $0.9 \%$ tax on earnings as defined for purposes of the Hospital Insurance Tax plus investment income. Investment income would include taxable interest, dividends, net positive capital gains, net positive income from estates and trusts, net positive income from rents, and net positive income from royalties. Tax would be imposed on earnings plus investment income in excess of $\$ 200,000$ ( $\$ 250,000$ for married couples filing a joint return). The threshold would not be indexed for inflation.
ithe a description of cash income, see
tp://www.taxpolicycenter.org/TaxModel/income.cfm
(3) The cash income percentile classes used in this table are based on the income distribution for the entire population and contain an equal number of people, not tax units. The incomes used are adjusted for family size by dividing by the square root of the number of people in the tax unit. The resulting percentile breaks are (in 2009 dollars): $20 \% \$ 13,465,40 \% \$ 25,159,60 \% \$ 42,626,80 \% \$ 69,583,90 \% \$ 100,255,95 \% \$ 141,875,99 \% \$ 375,887,99.9 \%$ \$1,773,679.
(4) Includes both filing and non-filing units but excludes those that are dependents of other tax units.
(5) After-tax income is cash income less: individual income tax net of refundable credits; corporate income tax; payroll taxes (Social Security and Medicare); and estate tax.
(6) Average federal tax (includes individual and corporate income tax, payroll taxes for Social Security and Medicare, and the estate tax) as a percentage of average cash income.

Source: Urban-Brookings Tax Policy Center Microsimulation Model (version 0509-4)
(1) Calendar year. Baseline is current law. Proposal would impose an additional $0.9 \%$ tax on earnings as defined for purposes of the Hospital Insurance Tax plus investment income. Investment income would include taxable interest, dividends, net positive capital gains, net positive income from estates and trusts, net positive income from rents, and net positive income from royalties. Tax would be imposed on earnings plus investment income in xcess of $\$ 200,000$ ( $\$ 250,000$ for married couples filing a joint return). The threshold would not be indexed for inflation
(2) Tax units with negative cash income are excluded from the lowest income class but are included in the totals. For a description of cash income, see
http://www.taxpolicycenter.org/TaxModel/income.cfm
The cash income percentile classes used in this table are based on the income distribution for the entire population and contain an equal number of people, not tax units. The incomes used are adjusted for family size by dividing by the sq
$99.9 \% ~ \$ 1,773,679$
(4) Includes both filing and non-filing units but excludes those that are dependents of outher tax units.
(5) After-tax income is cash income less: individual income tax net of refundable credits; corporate income tax; payroll taxes (Social Security and Medicare); and estate tax.
(6) Average federal tax (includes individual and corporate income tax, payroll taxes for Social Security and Medicare, and the estate tax) as a percentage of average cash income.

Source: Urban-Brookings Tax Policy Center Microsimulation Model (version 0509-4).
ote: Elderly tax units are those with either head or spouse (if filing jointly) age 65 or olde
(1) Calendar year. Baseline is current law. Proposal would impose an additional $0.9 \%$ tax on earnings as defined for purposes of the Hospital Insurance Tax plus investment income. Investment income would include taxable interest, dividends, net positive capital gains, net positive income from estates and trusts, net positive income from rents, and net positive income from royalties. Tax would be imposed on earnings plus investment income in xcess of $\$ 200,000$ ( $\$ 250,000$ for married couples filing a joint return). The threshold would not be indexed for inflation.
ithe description of cash income, see
tp://www.taxpolicycenter.org/TaxModel/income.cfm
(3) The cash income percentile classes used in this table are based on the income distribution for the entire population and contain an equal number of people, not tax units. The incomes used are adjusted for family size by dividing by the square root of the number of people in the tax unit. The resulting percentile breaks are (in 2009 dollars): $20 \% \$ 13,465,40 \% \$ 25,159,60 \% \$ 42,626,80 \% \$ 69,583,90 \% \$ 100,255,95 \% \$ 141,875,99 \% \$ 375,887,99.9 \%$ \$1,773,679
(4) Includes both filing and non-filing units but excludes those that are dependents of other tax units.
(5) After-tax income is cash income less: individual income tax net of refundable credits; corporate income tax; payroll taxes (Social Security and Medicare); and estate tax.
(6) Average federal tax (includes individual and corporate income tax, payroll taxes for Social Security and Medicare, and the estate tax) as a percentage of average cash income.
