(1) Calendar year. Baseline is current law. The proposal would: (a) extend the higher EITC credit value for families with 3 children and higher phase-out thresholds for married couples and allow it against the AMT; (b) modify the saver's credit making it equal to 50% of the first \$500 of retirement savings (\$1,000 for couples) and fully refundable; (c) create automatic 401(k)s and IRAs; (d) extend the American Opportunity Tax Credit; (e) extend the 31,000 refundability with a \$3,000 refundability with \$

(i) impose a 20 percent rate on capital gains and qualified dividends for taxpayers in the top two tax brackets and repeal the 8 percent and 18 percent rates for assets held for more than 5 years; (j) limit value of itemized deduction s to 28 percent; (k) maintain the estate tax at its 2009 parameters; (l) extend the 2001 and 2003 tax cuts for low and middle income individuals including marriage penalty relief, the 10,15, 25, 28 percent brackets, the 15 percent rate on capital gains and qualified dividends for taxpayers in those brackets.

(2) Tax units with negative cash income are excluded from the lowest income class but are included in the totals. For a description of cash income, see

http://www.taxpolicycenter.org/TaxModel/income.cfm

(3) The cash income percentile classes used in this table are based on the income distribution for the entire population and contain an equal number of people, not tax units. The incomes used are adjusted for family size by dividing by the square root of the number of people in the tax unit. The resulting percentile breaks are (in 2009 dollars): 20% \$13,219, 40% \$24,782, 60% \$41,864, 80% \$68,188, 90% \$97,830, 95% \$138,709, 99% \$316,704,90% \$16,704,67.

(4) Includes both filing and non-filing units but excludes those that are dependents of other tax units.

(5) After-tax income is cash income less: individual income tax net of refundable credits; corporate income tax; payroll taxes (Social Security and Medicare); and estate tax.
