Source: Urban-Brookings Tax Policy Center Microsimulation Model (version 0509-4).

Number of AMT Taxpayers (millions). Baseline: 4.5 Proposal: 4.5

(1) Calendar year. Current policy extends the 2009 AMT patch and indexes the AMT exemption, rate bracket threshold, and phaseout exemption threshold for inflation; makes the 2001 and 2003 individual income tax cuts permanent and makes 2009 estate tax law permanent. The proposal extends the Making Work Pay Credit through 2011.

(2) Tax units with negative cash income are excluded from the lowest income class but are included in the totals. For a description of cash income, see <http://www.taxpolicycenter.org/TaxModel/income.cfm>

(3) The cash income percentile classes used in this table are based on the income distribution for the entire population and contain an equal number of people, not tax units. The breaks are (in 2009 dollars): 20% \$17,709, 40% \$34,668, 60% \$63,846, 80% \$104,388, 90% \$167,146, 95% \$210,251, 99% \$555,037, 99.9% \$2,351,648.

(4) Includes both filing and non-filing units but excludes those that are dependents of other tax units.

(5) After-tax income is cash income less: individual income tax net of refundable credits; corporate income tax; payroll taxes (Social Security and Medicare); and estate tax.

(6) Average federal tax (includes individual and corporate income tax, payroll taxes for Social Security and Medicare, and the estate tax) as a percentage of average cash income.

Source: Urban-Brookings Tax Policy Center Microsimulation Model (version 0509-4).

(1) Calendar year. Current policy extends the 2009 AMT patch and indexes the AMT exemption, rate bracket threshold, and phaseout exemption threshold for inflation; makes the 2001 and 2003 individual income tax cuts permanent and makes 2009 estate tax law permanent. The proposal extends the Making Work Pay Credit through 2011.

(2) Tax units with negative cash income are excluded from the lowest income class but are included in the totals. For a description of cash income, see

<http://www.taxpolicycenter.org/TaxModel/income.cfm>

(3) The cash income percentile classes used in this table are based on the income distribution for the entire population and contain an equal number of people, not tax units. The incomes used are adjusted for family size by dividing by the square root of the number of people in the tax unit. The resulting percentile breaks are (in 2009 dollars): 20% \$11,939, 40% \$23,027, 60% \$39,580, 80% \$66,854, 90% \$96,556, 95% \$135,474, 99% \$347,747, 99.9% \$1,413,195.

(4) Includes both filing and non-filing units but excludes those that are dependents of other tax units.

(5) After-tax income is cash income less: individual income tax net of refundable credits; corporate income tax; payroll taxes (Social Security and Medicare); and estate tax.

(6) Average federal tax (includes individual and corporate income tax, payroll taxes for Social Security and Medicare, and the estate tax) as a percentage of average cash income.
