Source: Urban-Brookings Tax Policy Center Microsimulation Model (version 0509-5).
Number of AMT Taxpayers (millions). Baseline: 23.2
Proposal: 0.0
(1) Calendar year. Baseline is current policy and makes the 2001 and 2003 individual income tax cuts permanent, indexes the parameters of the AMT for inflation after 2009, and makes 2009 estate tax law permanent. Proposal is effective Jan. 1, 2011 and would (a) eliminate the AMT;(b) repeal the income and payroll tax exclusion for employer-sponsored health insurance; (c) provide a refundable tax credit equal to \$2,300 (\$5,700 for families) for the purchase of health insurance; (d) repeal the corporate income tax; (e) impose an $8.5 \%$ business consumption tax (BCT); and (f) allow taxpayers to choose between the current tax system and an alternative simplified tax system. The alternative tax system eliminates all adjustments to income, itemized deductions, tax credits, and the estate tax and has a standard deduction of $\$ 12,500$ ( $\$ 25,000$ for joint returns), personal exemptions of $\$ 3,500$, and rates of 10 percent up to $\$ 50,000$ ( $\$ 100,000$ for joint returns) and 25 percent above that level. Interest, dividends, capital gains, and non-wage business income would be excluded from tax under the alternative system. Dollar values for the alternative tax system are indexed for inflation; the refundable credit amount is indexed by the average growth rate of CPI and medical care expenses. Taxpayers are assumed to choose the system that miniizes tax liability
(2) Tax units with negative cash income are excluded from the lowest income class but are included in the totals. For a description of cash income, see http://www.taxpolicycenter.org/TaxModel/income.cfm
(3) The cash income percentile classes used in this table are based on the income distribution for the entire population and contain an equal number of people, not tax units. The breaks are (in 2009 dollars): $20 \% \$ 19,925,40 \% \$ 38,371,60 \% \$ 67,991,80 \% \$ 116,859,90 \% \$ 169,290,95 \% \$ 237,098,99 \% \$ 632,966,99.9 \% \$ 2,923,051$.
(4) Includes both filing and non-filing units but excludes those that are dependents of other tax units.
(5) After-tax income is cash income less: individual income tax net of refundable credits; corporate income tax; payroll taxes (Social Security and Medicare); and estate tax.
(6) Average federal tax (includes individual and corporate income tax, payroll taxes for Social Security and Medicare, and the estate tax) as a percentage of average cash income.

(1) Calendar year. Baseline is current policy and makes the 2001 and 2003 individual income tax cuts permanent, indexes the parameters of the AMT for inflation after 2009, and makes 2009 estate tax law
permanent. Proposal is effective Jan. 1,2011 and would (a) eliminate the AMT; (b) repeal the income and payroll tax exccusion for employer-sponsored health insurance: (c) provide a refundable tax creat permanent. Proposal is effective Jan. 1, 2011 and would (a) eliminate the AMT;(b) repeal the income and payroll tax exclusion for employer-sponsored health insurance; (c) provide a refundable tax credit equal to $\$ 2,300$ ( $\$ 5,700$ for families) for the purchase of health insurance; (d) repeal the corporate income tax; (e) impose an $8.5 \%$ business consumption tax (BCT); and (f) allow taxpayers to choose between the current tax system and an alternative simplified tax system. The alternative tax system eliminates all adjustments to income, itemized deductions, tax credits, and the estate tax and has a standard deduction
of $\$ 12,500$ ( $\$ 25,000$ for joint returns) personal exemptions of $\$ 3,500$, and rates of 10 percent up to $\$ 50,000$ ( $\$ 100,000$ for joint returns) and 25 percent above that level. Interest, dividends, capital gains, and of $\$ 12,500$ ( $\$ 25,000$ for joint returns), personal exemptions of $\$ 3,500$, and rates of 10 percent up to $\$ 50,000$ ( $\$ 100,000$ for joint returns) and 25 percent above that level. Interest, dividends, capital gains,
non-wage business income would be excluded from tax under the alternative system. Dollar values for the alternative tax system are indexed for inflation; the refundable credit amount is indexed by the
average growth rate of CPI and medical care expenses. Taxpayers are assumed to choose the tax system that minimizes tax liability.
(2) Tax units with negative cash income are excluded from the lowest income class but are included in the totals. For a description of cash income, se
http://www.taxpolicycenter.org/TaxModel/income.cfm
(3) The cash income percentile classes used in this table are based on the income distribution for the entire population and contain an equal number of people, not tax units. The incomes used are adjusted for family size by
dividing by the square root of the number of people in the tax unit. The resulting percentile breaks are (in 2009 dollars): $20 \% \$ 13,694,40 \% ~ \$ 25,631,60 \% ~ \$ 43,537,80 \% \$ 71,347,90 \% \$ 102,829,95 \% \$ 145,557,99 \% \$ 382,124$, 99.9\% \$1,787,588.
(5) After-tax income is cash income less: individual income tax net of refundable credits; corporate income tax; payroll taxes (Social Security and Medicare); and estate tax.
(6) Average federal tax (includes individual and corporate income tax, payroll taxes for Social Security and Medicare, and the estate tax) as a percentage of average cash income.

Note: Tax units with children are those claiming an exemption for children at home or away from home. (1) Calendar year. Baseline is current policy and makes the 2001 and 2003 individual income tax cuts permanent, indexes the parameters of the AMT for inflation after 2009, and makes 2009 estate tax law
permanent. Proposal is effective Jan. 1,2011 and would (a) eliminate the AMT;(b) repeal the income and payroll tax exclusion for employer-sponsored health insurance; (c) provide a refundable tax credit
equal to $\$ 2,300$ (\$5 700 for families) for the purchase of health insurance; (d) repeal the corporate income tax; (e) impose an $85 \%$ business consumption tax (BCT); and (f) allow taxpayers to choose betwe equal to $\$ 2,300$ ( $\$ 5,700$ for families) for the purchase of health insurance; ; (d) repeal the corporate income tax; (e) impose an $8.5 \%$ business consumption $\operatorname{tax}$ (BCT); and (f) allow taxpayers to choose between
the current tax system and an alternative simplified tax system. The alternative tax system eliminates all adjustments to income, itemized deductions, tax credits, and the estate tax and has a standard deduction of $\$ 12,500$ ( $\$ 25,000$ for joint returns), personal exemptions of $\$ 3,500$, and rates of 10 percent up to $\$ 50,000$ ( $\$ 100,000$ for joint returns) and 25 percent above that level. Interest, dividends, capital gains, and non-wage business income would be excluded from tax under the alternative system. Dollar values for the alternative tax system are indexed for inflation; the refundable credit amount is indexed by the average growth rate of CPI and medical care expenses. Taxpayers are assumed to choose the tax system that minimizes tax liability,
(2) Tax units with negative cash income are excluded from the lowest income class but are included in the totals. For a description of cash income, se
htp://www.taxpolicycenter.org/TaxModel/income.cfm
The cash income percentile classes used in this table are based on the income distribution for the entire population and contain an equal number of people, not tax units. The incomes used are adjusted for family size by dividing by the squar
$99.9 \% \$ 1,787,588$.
(4) Includes both filing and non-filing units but excludes those that are dependents of other tax units
(5) After-tax income is cash income less: individual income tax net of refundable credits; corporate income tax; payroll taxes (Social Security and Medicare); and estate tax.
(6) Average federal tax (includes individual and corporate income tax, payroll taxes for Social Security and Medicare, and the estate tax) as a percentage of average cash income.
