Proposal: 5.0

** This table is part of a series of tables showing the distributional effects of moving incrementally from current law to current policy. For definitions and further information, see "Related Tables: Moving Incrementally from Current Law to Current Policy" at

<http://taxpolicycenter.org/numbers/displayatab.cfm?template=simulation&SimID=366>

(1) Calendar year. Baseline is current law plus a permanent AMT patch at 2009 levels, indexed for inflation; extension of low- and middle-income tax cuts (extend the 10, 25, and 28 percent rates; set the standard deduction and 10 and 15 percent tax brackets for couples filing jointly to double those for singles; raise the EITC phaseout threshold for couples filing jointly; and extend expansions of the student loan interest deduction, the Earned Income Tax Credit (EITC), the Child and Dependent Care Tax Credit (CDCTC), and the Child Tax Credit (CTC); taxation of qualified dividends the same as long-term capital gains; reduced tax rates on long-term capital gains (0 percent for tax units in 15 percent bracket or lower, 15 percent for tax units in tax brackets above 15 percent); repeal of the personal exemption phaseout (PEP) and limitation on itemized deductions (Pease); extension of the 33 and 35 percent tax brackets. Policy is an estate tax set at the 2009 level, not indexed for inflation (\$3.5 million exemption, 45 percent tax rate).

(2) Tax units with negative cash income are excluded from the lowest income class but are included in the totals. For a description of cash income, see

<http://www.taxpolicycenter.org/TaxModel/income.cfm>

(3) Includes both filing and non-filing units but excludes those that are dependents of other tax units.

(4) After-tax income is cash income less: individual income tax net of refundable credits; corporate income tax; payroll taxes (Social Security and Medicare); and estate tax.

(5) Average federal tax (includes individual and corporate income tax, payroll taxes for Social Security and Medicare, and the estate tax) as a percentage of average cash income.

(1) Calendar year. Baseline is current law plus a permanent AMT patch at 2009 levels, indexed for inflation; extension of low- and middle-income tax cuts (extend the 10, 25, and 28 percent rates; set the standard deduction and 10 and 15 percent tax brackets for couples filing jointly to double those for singles; raise the EITC phaseout threshold for couples filing jointly; and extend expansions of the student loan interest deduction, the Earned Income Tax Credit (EITC), the Child and Dependent Care Tax Credit (CDCTC), and the Child Tax Credit (CTC); taxation of qualified dividends the same as long-term capital gains; reduced tax rates on long-term capital gains (0 percent for tax units in 15 percent bracket or lower, 15 percent for tax units in tax brackets above 15 percent); repeal of the personal exemption phaseout (PEP) and limitation on itemized deductions (Pease); extension of the 33 and 35 percent tax brackets. Policy is an estate tax set at the 2009 level, not indexed for inflation (\$3.5 million exemption, 45 percent tax rate).

(2) Tax units with negative cash income are excluded from the lowest income class but are included in the totals. For a description of cash income, see

<http://www.taxpolicycenter.org/TaxModel/income.cfm>

(3) Includes both filing and non-filing units but excludes those that are dependents of other tax units.

(4) After-tax income is cash income less: individual income tax net of refundable credits; corporate income tax; payroll taxes (Social Security and Medicare); and estate tax.

(5) Average federal tax (includes individual and corporate income tax, payroll taxes for Social Security and Medicare, and the estate tax) as a percentage of average cash income.
