Source: Urban-Brookings Tax Policy Center Microsimulation Model (version 0509-5).
Number of AMT Taxpayers (millions). Baseline: 3.8
Proposal: 3.7
** This table is part of a series of tables showing the distributional effects of moving incrementally from current policy to current law. For definitions and further information, see "Related Tables: Moving Incrementally from Current Policy to Current Law" at http://taxpolicycenter.org/numbers/displayatab.cfm?template=simulation\&SimID=367
(1) Calendar year. Baseline is current policy (extension of the 2001-2003 tax cuts and patching AMT using 2009 parameters indexed for inflation) plus estate tax at current law level- a 55 percent top tax rate and a $\$ 1$ million exemption, not indexed); top two tax brackets raised to 36 and 39.6 percent; restoration of the personal exemption phaseout (PEP) and the limitation on itemized deductions (Pease); increased tax rates on long-term capital gains ( 10 percent for tax units in 15 percent bracket, 20 percent for rest) and reduced rates for gains on assets held 5 years or longer. Policy is taxation of all dividends as ordinary income.
(2) Tax units with negative cash income are excluded from the lowest income class but are included in the totals. For a description of cash income, see http://www.taxpolicycenter.org/TaxModel/income.cfm
(3) The cash income percentile classes used in this table are based on the income distribution for the entire population and contain an equal number of people, not tax units. The breaks are (in 2009 dollars): 20\% \$19,356, $40 \% \$ 37,493,60 \% \$ 65,656,80 \% \$ 111,659,90 \% \$ 161,739,95 \% \$ 226,402,99 \% \$ 599,181,99.9 \% \$ 2,727,123$ (4) Includes both filing and non-filing units but excludes those that are dependents of other tax units.
(5) After-tax income is cash income less: individual income tax net of refundable credits; corporate income tax; payroll taxes (Social Security and Medicare); and estate tax.
(6) Average federal tax (includes individual and corporate income tax, payroll taxes for Social Security and Medicare, and the estate tax) as a percentage of average cash income.

Source: Urban-Brookings Tax Policy Center Microsimulation Model (version 0509-5).
(1) Calendar year. Baseline is current policy (extension of the 2001-2003 tax cuts and patching AMT using 2009 parameters indexed for inflation) plus estate tax at current law level-a 55 percent top tax rate and a $\$ 1$ million xemption, not indexed); top two tax brackets raised to 36 and 39.6 percent; restoration of the personal exemption phaseout (PEP) and the limitation on itemized deductions (Pease); increased tax rates on long-term capital gains 10 percent for tax units in 15 percent bracket, 20 percent for rest) and reduced rates for gains on assets held 5 years or longer. Policy is taxation of all dividends as ordinary income.
${ }^{2}$ ) Tax units with negative cash income are excluded from the lowest income class but are included in the totals. For a description of cash income, see
(tp)//www.taxpolicycenter.org/TaxModel/income.cfm
(3) The cash income percentile classes used in this table are based on the income distribution for the entire population and contain an equal number of people, not tax units. The incomes used are adjusted for family size by dividing by the square root of the number of people in the tax unit. The resulting percentile breaks are (in 2009 dollars): $20 \% \$ 13,219,40 \% ~ \$ 24,782,60 \% ~ \$ 41,864,80 \% ~ \$ 68,188,90 \% \$ 97,830,95 \% ~ \$ 138,709,99 \% ~ \$ 361,983,99.9 \%$ \$1,670,467.
(4) Includes both filing and non-filing units but excludes those that are dependents of other tax units.

Ar-tax income is cash income less: individual income tax net of refundable credits; corporate income tax; payroll taxes (Social Security and Medicare); and estate tax.
(6) Average federal tax (includes individual and corporate income tax, payroll taxes for Social Security and Medicare, and the estate tax) as a percentage of average cash income.

Policy is taxation of all dividends as ordinary income
(2) Tax units with negative cash income are excluded from the lowest income class but are included in the totals. For a description of cash income, see
http://www.taxpolicycenter.org/TaxModel/income.cfm
(3) The cash income percentile classes used in this table are based on the income distribution for the entire population and contain an equal number of people, not tax units. The incomes used are adjusted for family size by dividing by the square root of the number of people in the tax unit. The resulting percentile breaks are (in 2009 dollars): $20 \% \$ 13,219,40 \%$ \$24,782, $60 \% \$ 41,864,80 \% ~ \$ 68,188,90 \% \$ 97,830,95 \% \$ 138,709,99 \% \$ 361,983,99.9 \%$
1,670,467
(4) Includes both filing and non-filing units but excludes those that are dependents of other tax units.
(5) After-tax income is cash income less: individual income tax net of refundable credits; corporate income tax; payroll taxes (Social Security and Medicare); and estate tax.
(6) Average federal tax (includes individual and corporate income tax, payroll taxes for Social Security and Medicare, and the estate tax) as a percentage of average cash income.

Table T10-0165

## incremental Effects of Allowing the 2001 and 2003 Tax Cuts to Sunset

Tax All Dividends as Ordinary Income
Distribution of Federal Tax Change by Cash Income Percentile Adjusted for Family Size, $2012{ }^{1}$

Source: Urban-Brookings Tax Policy Center Microsimulation Model (version 0509-5).
Note: Elderly tax units are those with either head or spouse (if filing jointly) age 65 or older.
(1) Calendar year. Baseline is current policy (extension of the 2001-2003 tax cuts and patching AMT using 2009 parameters indexed for inflation) plus estate tax at current law level-a 55 percent top tax rate and a $\$ 1$ million xemption, not indexed); top two tax brackets raised to 36 and 39.6 percent; restoration of the personal exemption phaseout (PEP) and the limitation on itemized deductions (Pease); increased tax rates on long-term capital gains ( 10 percent for tax units in 15 percent bracket, 20 percent for rest) and reduced rates for gains on assets held 5 years or longer. Policy is taxation of all dividends as ordinary income.
2) Tax units with negative cash income are excluded from the lowest income class but are included in the totals. For a description of cash income, see
http://www.taxpolicycenter.org/TaxModel/income.cfm
(3) The cash income percentile classes used in this table are based on the income distribution for the entire population and contain an equal number of people, not tax units.
