Source: Urban-Brookings Tax Policy Center Microsimulation Model (version 0509-5).
Number of AMT Taxpayers (millions). Baseline: 19.7
Proposal: 4.3
(1) Calendar year. Baseline is current law, Proposal extends 2009 estate tax law and all the individual income tax provisions in the 2001 and 2003 tax cuts other than the high-income provisions. The proposal: retains a 20 percent rate on qualified dividends and capital gains for taxpayers in the top 2 tax brackets (because the proposal repeals the lower rates for gains on assets held for 5 years or more, some high-income taxpayers experience a tax increase); retains the limitation on itemized deductions (Pease) and the personal exemption phaseout (PEP) for taxpayers with income greater than $\$ 250,000$ for married couples ( $\$ 200,000$ for unmarried individuals), indexed for inflation after 2009; retains a top statutory tax rate of 39.6 percent; retains the 36 percent tax rate and adjusts the threshold for the 36 -percent bracket to equal $\$ 250,000$ less the standard deduction and two personal exemptions for married couples, $\$ 200,000$ less the standard deduction and one personal exemption for singles, and an amount equal to the midpoint of the married and single thresholds for heads of household, with the dollar values indexed for inflation after 2009.
(2) Tax units with negative cash income are excluded from the lowest income class but are included in the totals. For a description of cash income, see http://www.taxpolicycenter.org/TaxModel/income.cfm
(3) The cash income percentile classes used in this table are based on the income distribution for the entire population and contain an equal number of people, not tax units. The breaks are (in 2009 dollars): $20 \% \$ 19,356,40 \% \$ 37,493,60 \% \$ 65,656,80 \% \$ 111,659,90 \% \$ 161,739,95 \% \$ 226,402,99 \% \$ 599,181,99.9 \% \$ 2,727,123$.
(4) Includes both filing and non-filing units but excludes those that are dependents of other tax units.
(5) After-tax income is cash income less: individual income tax net of refundable credits; corporate income tax; payroll taxes (Social Security and Medicare); and estate tax.
(6) Average federal tax (includes individual and corporate income tax, payroll taxes for Social Security and Medicare, and the estate tax) as a percentage of average cash income.

Note: Tax units with children are those claiming an exemption for children at home or away from home.
(1) Calendar year. Baseline is current law, Proposal extends 2009 estate tax law and all the individual income tax provisions in the 2001 and 2003 tax cuts other than the high-income provisions. The proposal: retains a 20 percent rate on qualified dividends and capital gains for taxpayers in the top 2 tax brackets (because the proposal repeals the lower rates for gains on assets held for 5 years or more, some high-income taxpayers experience tax increase); retains the limitation on itemized deductions (Pease) and the personal exemption phaseout (PEP) for taxpayers with income greater than $\$ 250,000$ for married couples ( $\$ 200,000$ for unmarried individuals), indexed for inflation after 2009; retains a top statutory tax rate of 39.6 percent; retains the 36 percent tax rate and adjusts the threshold for the 36 -percent bracket to equal $\$ 250,000$ less the standard deduction and two persona exemptions for married couples, $\$ 200,000$ less the standard deduction and one personal exemption for singles, and an amount equal to the midpoint of the married and single thresholds for heads of household, with the dollar alues indexed for inflation after 2009
(2) Tax units with negative cash income are excluded from the lowest income class but are included in the totals. For a description of cash income, see
http://www.taxpolicycenter.org/TaxModel/income.cfm
(3) The cash income percentile classes used in this table are based on the income distribution for the entire population and contain an equal number of people, not tax units. The incomes used are adjusted for family size by dividing by the square root of the number of people in the tax unit. The resulting percentile breaks are (in 2009 dollars): $20 \% \$ 13,219,40 \% \$ 24,782,60 \% \$ 41,864,80 \% \$ 68,188,90 \% \$ 97,830,95 \% \$ 138,709,99 \% \$ 361,983$, .9\% \$1,670,467.
(4) Includes both filing and non-filing units but excludes those that are dependents of other tax units.
(5) After-tax income is cash income less: individual income tax net of refundable credits; corporate income tax; payroll taxes (Social Security and Medicare); and estate tax.
(6) Average federal tax (includes individual and corporate income tax, payroll taxes for Social Security and Medicare, and the estate tax) as a percentage of average cash income.
