Source: Urban-Brookings Tax Policy Center Microsimulation Model (version 0509-5).

Number of AMT Taxpayers (millions). Baseline: 4.8

Proposal: 5.0

(1) Calendar year. Baseline is the Administration's proposal relating to the top two statutory income tax rates. Proposal reduces the top two rates from 36 and 39.6 percent to 33 and 35 percent and reduces the threshold for the 36-percent bracket (this lower threshold causes a small tax increase, which is not offset by the lower rates for tax units with taxable income near the threshold).

(2) Tax units with negative cash income are excluded from the lowest income class but are included in the totals. For a description of cash income, see <http://www.taxpolicycenter.org/TaxModel/income.cfm>

(3) Includes both filing and non-filing units but excludes those that are dependents of other tax units.

(4) After-tax income is cash income less: individual income tax net of refundable credits; corporate income tax; payroll taxes (Social Security and Medicare); and estate tax.

(5) Average federal tax (includes individual and corporate income tax, payroll taxes for Social Security and Medicare, and the estate tax) as a percentage of average cash income.

(3) Includes both filing and non-filing units but excludes those that are dependents of other tax units.

(4) After-tax income is cash income less: individual income tax net of refundable credits; corporate income tax; payroll taxes (Social Security and Medicare); and estate tax.

(5) Average federal tax (includes individual and corporate income tax, payroll taxes for Social Security and Medicare, and the estate tax) as a percentage of average cash income.

Note: Tax units with children are those claiming an exemption for children at home or away from home.

(1) Calendar year. Baseline is the Administration's proposal relating to the top two statutory income tax rates. Proposal reduces the top two rates from 36 and 39.6 percent to 33 and 35 percent and reduces the threshold for the 36-percent bracket (this lower threshold causes a small tax increase, which is not offset by the lower rates for tax units with taxable income near the threshold).

(2) Tax units with negative cash income are excluded from the lowest income class but are included in the totals. For a description of cash income, see <http://www.taxpolicycenter.org/TaxModel/income.cfm>

(3) Includes both filing and non-filing units but excludes those that are dependents of other tax units.

(4) After-tax income is cash income less: individual income tax net of refundable credits; corporate income tax; payroll taxes (Social Security and Medicare); and estate tax.

(5) Average federal tax (includes individual and corporate income tax, payroll taxes for Social Security and Medicare, and the estate tax) as a percentage of average cash income.
