Source: Urban-Brookings Tax Policy Center Microsimulation Model (version 0509-5).

Number of AMT Taxpayers (millions). Baseline: 19.7

Proposal: 1.2

(1) Calendar year. Baseline is current law. Proposal extends the 2009 AMT exemption and indexes the exemption, AMT tax bracket threshold, and AMT exemption phaseout threshold for inflation; and allows personal non-refundable credits regardless of tentative AMT.

(2) Tax units with negative cash income are excluded from the lowest income class but are included in the totals. For a description of cash income, see

<http://www.taxpolicycenter.org/TaxModel/income.cfm>

(3) The cash income percentile classes used in this table are based on the income distribution for the entire population and contain an equal number of people, not tax units. The breaks are (in 2009 dollars): 20% \$19,356, 40% \$37,493, 60% \$65,656, 80% \$111,659, 90% \$161,739, 95% \$226,402, 99% \$599,181, 99.9% \$2,727,123.

(4) Includes both filing and non-filing units but excludes those that are dependents of other tax units.

(5) After-tax income is cash income less: individual income tax net of refundable credits; corporate income tax; payroll taxes (Social Security and Medicare); and estate tax.

(6) Average federal tax (includes individual and corporate income tax, payroll taxes for Social Security and Medicare, and the estate tax) as a percentage of average cash income.

(1) Calendar year. Baseline is current law. Proposal extends the 2009 AMT exemption and indexes the exemption, AMT tax bracket threshold, and AMT exemption phaseout threshold for inflation; and allows personal non-refundable credits regardless of tentative AMT.

(2) Tax units with negative cash income are excluded from the lowest income class but are included in the totals. For a description of cash income, see <http://www.taxpolicycenter.org/TaxModel/income.cfm>

(3) The cash income percentile classes used in this table are based on the income distribution for the entire population and contain an equal number of people, not tax units. The incomes used are adjusted for family size by dividing by the square root of the number of people in the tax unit. The resulting percentile breaks are (in 2009 dollars): 20% \$13,219, 40% \$24,782, 60% \$41,864, 80% \$68,188, 90% \$97,830, 95% \$138,709, 99% \$361,983, 99.9% \$1,670,467.

(4) Includes both filing and non-filing units but excludes those that are dependents of other tax units.

(5) After-tax income is cash income less: individual income tax net of refundable credits; corporate income tax; payroll taxes (Social Security and Medicare); and estate tax.

(6) Average federal tax (includes individual and corporate income tax, payroll taxes for Social Security and Medicare, and the estate tax) as a percentage of average cash income.
