Source: Urban-Brookings Tax Policy Center Microsimulation Model (version 0509-5).
Number of AMT Taxpayers (millions). Baseline: 4.0 Proposal:4.0
(1). Calendar year. Baseline is current law plus an AMT patch; extension of the 10, 25, and 28 percent tax rates, marriage penalty relief, child tax credit, child and dependent care credit, and student loan interest deduction. Proposal would extend the 15 percent rate on capital gains and qualified dividends ( 0 percent for those in the bottom two tax brackets) but would retain a 20 percent rate for those in the top two tax brackets. Proposal would also repeal the 8 and 18 percent rate for gains on assets held for five years or more (which could result in a tax increase for high-income taxpayers).
(2) Tax units with negative cash income are excluded from the lowest income class but are included in the totals. For a description of cash income, see
http://www.taxpolicycenter.org/TaxModel/income.cfm
(3) Includes both filing and non-filing units but excludes those that are dependents of other tax units.
(4) After-tax income is cash income less: individual income tax net of refundable credits; corporate income tax; payroll taxes (Social Security and Medicare); and estate tax.
(5) Average federal tax (includes individual and corporate income tax, payroll taxes for Social Security and Medicare, and the estate tax) as a percentage of average cash income.

(1). Calendar year. Baseline is current law plus an AMT patch; extension of the 10, 25 , and 28 percent tax rates, marriage penalty relief, child tax credit, child and dependent care credit, and student loan interest deduction. Proposal would extend the 15 percent rate on capital gains and qualified dividends ( 0 percent for those in the bottom two tax brackets) but would retain a 20 percent rate for those in the top two tax brackets. Proposal would also repeal the 8 and 18 percent rate for gains on assets held for five years or more (which could result in a tax increase for high-income taxpayers).
(2) Tax units with negative cash income are excluded from the lowest income class but are included in the totals. For a description of cash income, see
http://www.taxpolicycenter.org/TaxModel/income.cfm
(3) Includes both filing and non-filing units but excludes those that are dependents of other tax units.
(4) After-tax income is cash income less: individual income tax net of refundable credits; corporate income tax; payroll taxes (Social Security and Medicare); and estate tax.
(5) Average federal tax (includes individual and corporate income tax, payroll taxes for Social Security and Medicare, and the estate tax) as a percentage of average cash income.
