Source: Urban-Brookings Tax Policy Center Microsimulation Model (version 0509-4).
(1) Calendar year. Baseline is current policy which extends the 2001 and 2003 tax cuts, the AMT patch, and 2009 estate tax law. The proposal eliminates most major tax expenditures, including preferential rates on capital gains and qualified dividends; all itemized deductions, except deduction for miscellaneous expenses above a $2 \%$-of-AGI floor; exemption on all municipal bond interest; all above-the-line deductions except those for the self-employment tax, moving expenses, and alimony paid; and all tax credits except the foreign tax credit, the child tax credit, and the earned income tax credit; includes $85 \%$ of Social Security benefits in taxable income; repeals the AMT, PEP, and Pease; taxes inside buildup in life insurance and annuities; repeals the foreign earned income exclusion; taxes unrealized capital gains at death; includes benefits under Section 125 cafeteria plans and Employer-Sponsored Insurance (ESI) benefits in taxable income for individual income tax purposes; eliminates contributions to tax-deferred retirement accounts; and taxes accruals in defined benefit pension plans. The proposal implements a three-rate structure with statutory tax rates of 9,15 , and 24 percent; the threshold for the 15 percent rate would be the same as that for the 28 percent rate under current law; the threshold for the 24 percent rate would be the same as that for the 36 percent rate under the Administration's budget proposal. The proposal increases the Social Security wage base by an additional 2 percent per year until 2050 (taxable maximum would be $\$ 140,100$ in 2015) and phases in a 15 cent increase in the gasoline tax (average increase in 2015 would be 13.5 cents). We assume corporate income tax revenue would be unchanged (lower corporate rate would be offset by base broadeners).
(2) Tax units with negative cash income are excluded from the lowest income class but are included in the totals. For a description of cash income see
http://www.taxpolicycenter.org/TaxModel/income.cfm 40\% 39827, 60\% 70585, 80\% 121920, 90\% 177321, 95\% 250235, 99\% 662637, 99.9\% 3040915
(4) After-tax income is cash income less: individual income tax net of refundable credits; corporate income tax; payroll taxes (Social Security and Medicare); and estate tax.
(6) Includes both filing and non-filing units but excludes those that are dependents of other tax units.
