## Source: Urban-Brookings Tax Policy Center Microsimulation Model (version 0411-2),

Number of AMT Taxpayers (millions). Baseline: 4.5
Proposal: 4.5

* Less than 0.05
** Insufficient data
(1) Calendar year. Baseline is current policy, which makes 2011 tax law permanent with the exception of the temporary 2 percent reduction in Social Security payroll taxes.

Proposal would require taxpayers to pay the higher of their tax under regular rules, including any applicable AMT liability, and an amount equal to 21 percent of modified AGI (MAGI), defined as AGI plus tax-exempt interest income. The 21 percent rate would phase in over a range of $\$ 250,000$ to $\$ 500,000$ of MAGI for married couples ( $\$ 200,000$ to $\$ 400,000$ for singles and heads of household), indexed for inflation after 2009.
(2) Tax units with negative cash income are excluded from the lowest income class but are included in the totals. For a description of cash income, see
http://www.taxpolicycenter.org/TaxModel/income.cfm
(3) The cash income percentile classes used in this table are based on the income distribution for the entire population and contain an equal number of people, not tax units. The breaks are (in 2011 dollars): $20 \%$ \$17,910; $40 \%$ \$37,091; $60 \% \$ 64,533 ; 80 \% \$ 111,349 ; 90 \% \$ 160,384 ; 95 \% \$ 227,324 ; 99 \% \$ 593,011 ; 99.9 \% \$ 2,682,257$.
(4) Includes both filing and non-filing units but excludes those that are dependents of other tax units.
(5) After-tax income is cash income less: individual income tax net of refundable credits; corporate income tax; payroll taxes (Social Security and Medicare); and estate tax.
(6) Average federal tax (includes individual and corporate income tax, payroll taxes for Social Security and Medicare, and the estate tax) as a percentage of average cash income.

## Source: Urban-Brookings Tax Policy Center Microsimulation Model (version 0411-2),

* Less than 0.05
(1) Calendar year. Baseline is current policy, which makes 2011 tax law permanent with the exception of the temporary 2 percent reduction in Social Security payroll taxes. Proposal would require taxpayers to pay the higher of their tax under regular rules, including any applicable AMT liability, and an amount equal to 21 percent of modified AGI (MAGI), defined as AGI plus tax-exempt interest income. The 21 percent ate would phase in over a range of $\$ 250,000$ to $\$ 500,000$ of MAGI for married couples $\$ \$ 200,000$ to $\$ 400,000$ for singles and heads of household), indexed for inflation after 2009 ,
(2) Tax units with negative cash income are excluded from the lowest income class but are included in the totals. For a description of cash income, see
titp://www.taxpolicycenter.org/TaxModel/income.cfm
(3) The cash income percentile classes used in this table are based on the income distribution for the entire population and contain an equal number of people, not tax units. The incomes used are adjusted for family size by dividing by the square root of the number of people in the tax unit. The resulting percentile breaks are (in 2011 dollars): 20\% $\$ 12,691 ; 40 \%$; 24,$715 ; 60 \% ~ \$ 41,205 ; 80 \% ~ \$ 67,703 ; 90 \% ~ \$ 97,820 ; 95 \%$ \$138,778; 99\% \$358,616; 99.9\% \$1,621,247.
(4) Includes both filing and non-filing units but excludes those that are dependents of other tax units.
(5) After-tax income is cash income less: individual income tax net of refundable credits; corporate income tax; payroll taxes (Social Security and Medicare); and estate tax.
(6) Average federal tax (includes individual and corporate income tax, payroll taxes for Social Security and Medicare, and the estate tax) as a percentage of average cash income.

Less than 0.05
Note: Elderly tax units are those with either head or spouse (if filing jointly) age 65 or older.
(1) Calendar year. Baseline is current policy, which makes 2011 tax law permanent with the exception of the temporary 2 percent reduction in Social Security payroll taxes. Proposal would require taxpayers to pay the higher of their tax under regular rules, including any applicable AMT liability, and an amount equal to 21 percent of modified AGI (MAGI), defined as AGI plus tax-exempt interest income. The 21 percent

(2) Tax units with negative cash income are excluded from
$\frac{h t p}{}$ (3) The Mw. taxpolicycenter.org/TaxModelincome.cfm
3) The cash income percentile classes used in this table are based on the income distribution for the entire population and contain an equal number of people, not tax units. The incomes used are adjusted for family size by dividing by the square root of the number of people in the tax unit. The resulting percentile breaks are (in 2011 dollars): $20 \% \$ 12,691 ; 40 \% ~ \$ 24,715 ; 60 \% \$ 41,205 ; 80 \% ~ \$ 67,703 ; 90 \% \$ 97,820 ; 95 \%$ 3 $38,71,66 ; 99.9 \%$ \$1,621,247.
