Number of AMT Taxpayers (millions). Baseline: 4.5 Proposal: 5.1

* Less than 0.05
** Insufficient data
(1) Calendar year. Baseline is current policy. Proposal: repeals certain provisions in the 2001 and 2003 individual income tax cuts for married taxpayers with incomes greater than $\$ 250,000$ ( $\$ 200,000$ for singles), indexed for inflation after 2009, as proposed in Administration's FY2012 budget; reinstates 2009 estate tax rate and exemption, unindexed; limits the value of all itemized deductions and certain other tax expenditures to 28 percent for married taxpayers with AGI greater than $\$ 250,000$ ( $\$ 200,000$ for singles), indexed for inflation after 2009; taxes carried interest in investment partnerships as ordinary income; closes loopholes for corporate jet depreciation; repeals oil and gas subsidies; broadens business tax base; and makes certain changes to international taxation. Estimates assume that taxpayers would adjust their investment portfolio and optimally pay down their mortgage balance if their tax benefit from mortgage interest were reduced. For a description of TPC's current law and current policy baselines, see http://www.taxpolicycenter.org/T11-0270
(2) Tax units with negative cash income are excluded from the lowest income class but are included in the totals. For a description of cash income, see
http://www.taxpolicycenter.org/TaxModel/income.cfm
(3) The cash income percentile classes used in this table are based on the income distribution for the entire population and contain an equal number of people, not tax units. The breaks are (in 2011 dollars): 20\% \$17,909; 40\% \$37,090; $60 \%$ \$64,531; $80 \%$ \$111,344; $90 \%$ \$160,377; 95\% \$227,314; 99\% \$592,985; 99.9\% \$2,682,143.
(4) Includes both filing and non-filing units but excludes those that are dependents of other tax units.
(5) After-tax income is cash income less: individual income tax net of refundable credits; corporate income tax; payroll taxes (Social Security and Medicare); and estate tax.
(6) Average federal tax (includes individual and corporate income tax, payroll taxes for Social Security and Medicare, and the estate tax) as a percentage of average cash

(3) The cash income percentile classes used in this table are based on the income distribution for the entire population and contain an equal number of people, not tax units. The incomes used are adjusted for family size by dividing by the square root of the number of people in the tax unit. The resulting percentile breaks are (in 2011 dollars): $20 \% \$ 12,690 ; 40 \% \$ 24,714 ; 60 \% ~ \$ 41,203 ; 80 \% \$ 67,700 ; 90 \% \$ 97,816 ; 95 \%$ \$138,772; 99\% \$358,601; 99.9\% \$1,621,178.
(4) Includes both filing and non-filing units but excludes those that are dependents of other tax units.
(5) Atter-tax income is
(5) After-tax income is cash income less: individual income tax net of refundable credits; corporate income tax; payroll taxes (Social Security and Medicare); and estate tax
(6) Average federal tax (includes individual and corporate income tax, payroll taxes for Social Security and Medicare, and the estate tax) as a percentage of average cash income.

(1) Calendar year. Baseline is current policy. Proposal: repeals certain provisions in the 2001 and 2003 individual income tax cuts for married taxpayers with incomes greater than $\$ 250,000$ ( $\$ 200,000$ for singles), indexed for inflation after 2009, as proposed in Administration's FY2012 budget; reinstates 2009 estate tax rate and exemption, unindexed; limits the value of all itemized deductions and certain othe tax expenditures to 28 percent for married taxpayers with AGI greater than $\$ 250,000$ ( $\$ 200,000$ for singles), indexed for inflation after 2009; taxes carried interest in investment partnerships as ordinary income; closes loopholes for corporate jet depreciation; repeals oil and gas subsidies; broadens business tax base; and makes certain changes to international taxation. Estimates assume that taxpayers would adjust their investment portfolio and optimally pay down their mortgage balance if their tax benefit from mortgage interest were reduced. For a description of TPC's current law and current policy baselines, see
etp://www.taxpolicycenter.org/T11-0270
(2) Tax units with negative cash income are excluded from the lowest income class but are included in the totals. For a description of cash income, see
(3) The cash income percentile classes used in this table are based on the income distribution for the entire population and contain an equal number of people, not tax units. The incomes used are adjusted for family size by dividing by the square root of the number of people in the tax unit. The resulting percentile breaks are (in 2011 dollars): $20 \% \$ 12,690 ; 40 \% ~ \$ 24,714 ; 60 \% \$ 41,203 ; 80 \% \$ 67,700 ; 90 \% \$ 97,816 ; 95 \%$ 138,772; 99\% \$358,601; 99.9\% \$1,621,178.

Note: Elderly tax units are those with either head or spouse (if filing jointly) age 65 or older.
(1) Calendar year
(1) Calendar year. Baseline is current policy. Proposal: repeals certain provisions in the 2001 and 2003 individual income tax cuts for married taxpayers with incomes greater than $\$ 250,000$ ( $\$ 200,000$ for singles), indexed for inflation after 2009, as proposed in Administration's FY2012 budget; reinstates 2009 estate tax rate and exemption, unindexed; limits the value of all itemized deductions and certain other tax expenditures to 28 percent for married taxpayers with AGI greater than $\$ 250,000$ ( $\$ 200,000$ for singles), indexed for inflation after 2009 ; taxes carried interest in investment partnerships as ordinary income; closes loopholes for corporate jet depreciation; repeals oil and gas subsidies; broadens business tax base; and makes certain changes to international taxation. Estimates assume that taxpayers would adust their inyestment porffolio and see
(2) Tax units with negative cash income are excluded from the lowest income class but are included in the totals. For a description of cash income, see
$\frac{\text { http: } / / / \text { www.taxpolicycenter.org/TaxModel/income.cfm }}{\text { (3) The cash income percentile classes used in this table are based on the income distribution for the entire population and contain an equal number of people, not tax units. The incomes used are adjusted for }}$ family size by dividing by the square root of the number of people in the tax unit. The resulting percentile breaks are (in 2011 dollars): $20 \% \$ 12,690 ; 40 \% \$ 24,714 ; 60 \% \$ 41,203 ; 80 \% \$ 67,700 ; 90 \% \$ 97,816$; $95 \%$ \$138,772; 99\% \$358,601; 99.9\% \$1,621,178.
4) Includes both filing and non-filing units but excludes those that are dependents of other tax units
6) Avre fare (social Security and Medicare); and estate tax.
(6) Average federal tax (includes individual and corporate income tax, payroll taxes for Social Security and Medicare, and the estate tax) as a percentage of average cash income.
