Number of AMT Taxpayers (millions). Baseline: 4.5

Proposal: 5.3

* Less than 0.05

** Insufficient data

(1) Calendar year. Baseline is current policy. Proposal would a) reinstate the 36 and 39.6 percent tax brackets with the threshold for the 36 percent bracket at \$200,000 (single), \$250,000 (married), or \$225,000 (head of household), indexed for inflation after 2009, less the standard deduction and one personal exemption (two if married); b) set the thresholds for PEP and Pease at \$250,000 of AGI (married) and \$200,000 (single), indexed for inflation after 2009; c) tax capital gains at 20% and qualified dividends at ordinary rates for taxpayers in the top two brackets and repeal the 8%/18% rates for assets held more than 5 years; and d) limit itemized deductions and certain other tax expenditures to 28% for taxpayers in the top two brackets. For a description of TPC's current law and current policy baselines, see <http://www.taxpolicycenter.org/T11-0270>

(2) Tax units with negative cash income are excluded from the lowest income class but are included in the totals. For a description of cash income, see <http://www.taxpolicycenter.org/TaxModel/income.cfm>

(3) The cash income percentile classes used in this table are based on the income distribution for the entire population and contain an equal number of people, not tax units. The breaks are (in 2011 dollars): 20% \$17,909; 40% \$37,090; 60% \$64,531; 80% \$111,344; 90% \$160,377; 95% \$227,314; 99% \$592,985; 99.9% \$2,682,143.

(4) Includes both filing and non-filing units but excludes those that are dependents of other tax units.

(5) After-tax income is cash income less: individual income tax net of refundable credits; corporate income tax; payroll taxes (Social Security and Medicare); and estate tax.

(6) Average federal tax (includes individual and corporate income tax, payroll taxes for Social Security and Medicare, and the estate tax) as a percentage of average cash income.

* Less than 0.05

(1) Calendar year. Baseline is current policy. Proposal would a) reinstate the 36 and 39.6 percent tax brackets with the threshold for the 36 percent bracket at \$200,000 (single), \$250,000 (married), or \$225,000 (head of household), indexed for inflation after 2009, less the standard deduction and one personal exemption (two if married); b) set the thresholds for PEP and Pease at \$250,000 of AGI (married) and \$200,000 (single), indexed for inflation after 2009; c) tax capital gains at 20% and qualified dividends at ordinary rates for taxpayers in the top two brackets and repeal the 8%/18% rates for assets held more than 5 years; and d) limit itemized deductions and certain other tax expenditures to 28% for taxpayers in the top two brackets. For a description of TPC's current law and current policy baselines, see <http://www.taxpolicycenter.org/T11-0270>

(2) Tax units with negative cash income are excluded from the lowest income class but are included in the totals. For a description of cash income, see

<http://www.taxpolicycenter.org/TaxModel/income.cfm>

(3) The cash income percentile classes used in this table are based on the income distribution for the entire population and contain an equal number of people, not tax units. The incomes used are adjusted for family size by dividing by the square root of the number of people in the tax unit. The resulting percentile breaks are (in 2011 dollars): 20% \$12,690; 40% \$24,714; 60% \$41,203; 80% \$67,700; 90% \$97,816; 95% \$138,772; 99% \$358,601; 99.9% \$1,621,178.

(4) Includes both filing and non-filing units but excludes those that are dependents of other tax units.

(5) After-tax income is cash income less: individual income tax net of refundable credits; corporate income tax; payroll taxes (Social Security and Medicare); and estate tax.

(6) Average federal tax (includes individual and corporate income tax, payroll taxes for Social Security and Medicare, and the estate tax) as a percentage of average cash income.
