Source: Urban-Brookings Tax Policy Center Microsimulation Model (version 0411-3).

Number of AMT Taxpayers (millions). Baseline: 27.0

Proposal: 27.0

\* Less than 0.05

\*\* Insufficient data

(1) Calendar year. Baseline is current law without the proposal. Proposal is the 3.8 percent unearned income Medicare contribution enacted by the health reform legislation. For a description of TPC's current law and current policy baselines, see

http://www.taxpolicycenter.org/T11-0270

(2) Tax units with negative cash income are excluded from the lowest income class but are included in the totals. For a description of cash income, see

http://www.taxpolicycenter.org/TaxModel/income.cfm

(3) The cash income percentile classes used in this table are based on the income distribution for the entire population and contain an equal number of people, not tax units. The breaks are (in 2011 dollars): 20% \$19,342; 40% \$39,862; 60% \$69,074; 80% \$119,546; 90% \$169,987; 95% \$242,597; 99% \$629,809; 99.9% \$2,868,534.

(4) Includes both filing and non-filing units but excludes those that are dependents of other tax units.

(5) After-tax income is cash income less: individual income tax net of refundable credits; corporate income tax; payroll taxes (Social Security and Medicare); and estate tax.

(6) Average federal tax (includes individual and corporate income tax, payroll taxes for Social Security and Medicare, and the estate tax) as a percentage of average cash income.

Source: Urban-Brookings Tax Policy Center Microsimulation Model (version 0411-3).

Number of AMT Taxpayers (millions). Baseline: 27.0 Proposal: 27.0

(1) Calendar year. Baseline is current law without the proposal. Proposal is the 3.8 percent unearned income Medicare contribution enacted by the health reform legislation. For a description of TPC's current law and current policy baselines, see

http://www.taxpolicycenter.org/T11-0270

(2) Tax units with negative cash income are excluded from the lowest income class but are included in the totals. For a description of cash income, see

http://www.taxpolicycenter.org/TaxModel/income.cfm

(3) The cash income percentile classes used in this table are based on the income distribution for the entire population and contain an equal number of people, not tax units. The breaks are (in 2011 dollars): 20% \$19,342; 40% \$39,862; 60% \$69,074; 80% \$119,546; 90% \$169,987; 95% \$242,597; 99% \$629,809; 99.9% \$2,868,534.

(4) Includes both filing and non-filing units but excludes those that are dependents of other tax units.

Source: Urban-Brookings Tax Policy Center Microsimulation Model (version 0411-3).

Number of AMT Taxpayers (millions). Baseline: 27.0 \* Less than 0.05

(1) Calendar year. Baseline is current law without the proposal. Proposal is the 3.8 percent unearned income Medicare contribution enacted by the health reform legislation. For a description of TPC's current law and current policy baselines, see

http://www.taxpolicycenter.org/T11-0270

(2) Tax units with negative cash income are excluded from the lowest income class but are included in the totals. For a description of cash income, see http://www.taxpolicycenter.org/TaxModel/income.cfm

(3) The cash income percentile classes used in this table are based on the income distribution for the entire population and contain an equal number of people, not tax units. The incomes used are adjusted for family size by dividing by the square root of the number of people in the tax unit. The resulting percentile breaks are (in 2011 dollars): 20% \$13,687; 40% \$26,567; 60% \$44,163; 80% \$72,423; 90% \$104,181; 95% \$147,975; 99% \$384,375; 99.9% \$1,764,281.

(4) Includes both filing and non-filing units but excludes those that are dependents of other tax units.

(5) After-tax income is cash income less: individual income tax net of refundable credits; corporate income tax; payroll taxes (Social Security and Medicare); and estate tax. (6) Average federal tax (includes individual and corporate income tax, payroll taxes for Social Security and Medicare, and the estate tax) as a percentage of average cash income.

Proposal: 27.0

\* Less than 0.05

(1) Calendar year. Baseline is current law without the proposal. Proposal is the 3.8 percent unearned income Medicare contribution enacted by the health reform legislation. For a description of TPC's current law and current policy baselines, see

http://www.taxpolicycenter.org/T11-0270

(2) Tax units with negative cash income are excluded from the lowest income class but are included in the totals. For a description of cash income, see <a href="http://www.taxpolicycenter.org/TaxModel/income.cfm">http://www.taxpolicycenter.org/TaxModel/income.cfm</a>

(3) The cash income percentile classes used in this table are based on the income distribution for the entire population and contain an equal number of people, not tax units. The incomes used are adjusted for family size by dividing by the square root of the number of people in the tax unit. The resulting percentile breaks are (in 2011 dollars): 20% \$13,687; 40% \$26,567; 60% \$44,163; 80% \$72,423; 90% \$104,181; 95% \$147,975; 99% \$384,375; 99.9% \$1,764,281.

(4) Includes both filing and non-filing units but excludes those that are dependents of other tax units.

\* Less than 0.05

(1) Calendar year. Baseline is current law without the proposal. Proposal is the 3.8 percent unearned income Medicare contribution enacted by the health reform legislation. For a description of TPC's current law and current policy baselines, see

http://www.taxpolicycenter.org/T11-0270

(2) Tax units with negative cash income are excluded from the lowest income class but are included in the totals. For a description of cash income, see http://www.taxpolicycenter.org/TaxModel/income.cfm

(3) The cash income percentile classes used in this table are based on the income distribution for the entire population and contain an equal number of people, not tax units. The incomes used are adjusted for family size by dividing by the square root of the number of people in the tax unit. The resulting percentile breaks are (in 2011 dollars): 20% \$13,687; 40% \$26,567; 60% \$44,163; 80% \$72,423; 90% \$104,181; 95% \$147,975; 99% \$384,375; 99.9% \$1,764,281.

(4) Includes both filing and non-filing units but excludes those that are dependents of other tax units.

(1) Calendar year. Baseline is current law without the proposal. Proposal is the 3.8 percent unearned income Medicare contribution enacted by the health reform legislation. For a description of TPC's current law and current policy baselines, see

http://www.taxpolicycenter.org/T11-0270

(2) Tax units with negative cash income are excluded from the lowest income class but are included in the totals. For a description of cash income, see <a href="http://www.taxpolicycenter.org/TaxModel/income.cfm">http://www.taxpolicycenter.org/TaxModel/income.cfm</a>

(3) The cash income percentile classes used in this table are based on the income distribution for the entire population and contain an equal number of people, not tax units. The incomes used are adjusted for family size by dividing by the square root of the number of people in the tax unit. The resulting percentile breaks are (in 2011 dollars): 20% \$13,687; 40% \$26,567; 60% \$44,163; 80% \$72,423; 90% \$104,181; 95% \$147,975; 99% \$384,375; 99.9% \$1,764,281.

(4) Includes both filing and non-filing units but excludes those that are dependents of other tax units.

Source: Urban-Brookings Tax Policy Center Microsimulation Model (version 0411-3).

\* Less than 0.05

Note: Elderly tax units are those with either head or spouse (if filing jointly) age 65 or older.

(1) Calendar year. Baseline is current law without the proposal. Proposal is the 3.8 percent unearned income Medicare contribution enacted by the health reform legislation. For a description of TPC's current law and current policy baselines, see

http://www.taxpolicycenter.org/T11-0270

(2) Tax units with negative cash income are excluded from the lowest income class but are included in the totals. For a description of cash income, see http://www.taxpolicycenter.org/TaxModel/income.cfm

(3) The cash income percentile classes used in this table are based on the income distribution for the entire population and contain an equal number of people, not tax units. The incomes used are adjusted for family size by dividing by the square root of the number of people in the tax unit. The resulting percentile breaks are (in 2011 dollars): 20% \$13,687; 40% \$26,567; 60% \$44,163; 80% \$72,423; 90% \$104,181; 95% \$147,975; 99% \$384,375; 99.9% \$1,764,281.

(4) Includes both filing and non-filing units but excludes those that are dependents of other tax units.
