Number of AMT Taxpayers (millions). Baseline: 4.8

Proposal: 34.9

\* Less than 0.05

\*\* Insufficient data

(1) Calendar year. Baseline is 2012 current law with the alternative minimum tax exemption amount set to 2011 levels, indexed for inflation, and with nonrefundable credits allowed against AMT liability. The proposal is actual 2012 current law (i.e. allows AMT parameters to revert to unpatched levels). Estimates use 2013 income levels for both the baseline and the proposal. For a description of TPC's current law and current policy baselines, see

<http://www.taxpolicycenter.org/T11-0270>

(2) Tax units with negative cash income are excluded from the lowest income class but are included in the totals. For a description of cash income, see

<http://www.taxpolicycenter.org/TaxModel/income.cfm>

(3) The cash income percentile classes used in this table are based on the income distribution for the entire population and contain an equal number of people, not tax units. The breaks are (in 2011 dollars): 20% \$16,812; 40% \$33,542; 60% \$59,486; 80% \$103,465; 90% \$163,173; 95% \$210,998; 99% \$532,613; 99.9% \$2,178,886.

(4) Includes both filing and non-filing units but excludes those that are dependents of other tax units.

(5) After-tax income is cash income less: individual income tax net of refundable credits; corporate income tax; payroll taxes (Social Security and Medicare); and estate tax.

(6) Average federal tax (includes individual and corporate income tax, payroll taxes for Social Security and Medicare, and the estate tax) as a percentage of average cash income.

\* Less than 0.05

(1) Calendar year. Baseline is 2012 current law with the alternative minimum tax exemption amount set to 2011 levels, indexed for inflation, and with nonrefundable credits allowed against AMT liability. The proposal is actual 2012 current law (i.e. allows AMT parameters to revert to unpatched levels). Estimates use 2013 income levels for both the baseline and the proposal. For a description of TPC's current law and current policy baselines, see

<http://www.taxpolicycenter.org/T11-0270>

(2) Tax units with negative cash income are excluded from the lowest income class but are included in the totals. For a description of cash income, see

<http://www.taxpolicycenter.org/TaxModel/income.cfm>

(3) The cash income percentile classes used in this table are based on the income distribution for the entire population and contain an equal number of people, not tax units. The incomes used are adjusted for family size by dividing by the square root of the number of people in the tax unit. The resulting percentile breaks are (in 2011 dollars): 20% \$11,688; 40% \$22,351; 60% \$38,055; 80% \$65,353; 90% \$95,935; 95% \$134,201; 99% \$335,779; 99.9% \$1,350,445.

(4) Includes both filing and non-filing units but excludes those that are dependents of other tax units.

(5) After-tax income is cash income less: individual income tax net of refundable credits; corporate income tax; payroll taxes (Social Security and Medicare); and estate tax.

(6) Average federal tax (includes individual and corporate income tax, payroll taxes for Social Security and Medicare, and the estate tax) as a percentage of average cash income.
