Source: Urban-Brookings Tax Policy Center Microsimulation Model (version 0411-2).

Number of AMT Taxpayers (millions). Baseline: 4.3

Proposal: 3.5

(1) Calendar year. Baseline is current law. Proposal repeals itemized deductions for mortgage interest on owner-occupied homes, state and local income or sales tax, charitable contributions, and medical expenses. Estimates assume that taxpayers would adjust their investment portfolio and optimally pay down their mortgage balance if their tax benefit from mortgage interest were reduced. Deductions for unreimbursed business expenses, casualty and theft loss, and investment interest expense are converted to above-the-line deductions for tax units choosing to take itemized deductions under current law. For a description of TPC's current law and current policy baselines, see <http://www.taxpolicycenter.org/T11-0270>

(2) Tax units with negative cash income are excluded from the lowest income class but are included in the totals. For a description of cash income, see

<http://www.taxpolicycenter.org/TaxModel/income.cfm>

(3) Includes both filing and non-filing units but excludes those that are dependents of other tax units.

(4) After-tax income is cash income less: individual income tax net of refundable credits; corporate income tax; payroll taxes (Social Security and Medicare); and estate tax.

(5) Average federal tax (includes individual and corporate income tax, payroll taxes for Social Security and Medicare, and the estate tax) as a percentage of average cash income.

(1) Calendar year. Baseline is current law. Proposal repeals itemized deductions for mortgage interest on owner-occupied homes, state and local income or sales tax, charitable contributions, and medical expenses. Estimates assume that taxpayers would adjust their investment portfolio and optimally pay down their mortgage balance if their tax benefit from mortgage interest were reduced. Deductions for unreimbursed business expenses, casualty and theft loss, and investment interest expense are converted to above-the-line deductions for tax units choosing to take itemized deductions under current law. For a description of TPC's current law and current policy baselines, see <http://www.taxpolicycenter.org/T11-0270>

(2) Tax units with negative cash income are excluded from the lowest income class but are included in the totals. For a description of cash income, see <http://www.taxpolicycenter.org/TaxModel/income.cfm>

(3) Includes both filing and non-filing units but excludes those that are dependents of other tax units.

(4) After-tax income is cash income less: individual income tax net of refundable credits; corporate income tax; payroll taxes (Social Security and Medicare); and estate tax.

(5) Average federal tax (includes individual and corporate income tax, payroll taxes for Social Security and Medicare, and the estate tax) as a percentage of average cash income.
