Source: Urban-Brookings Tax Policy Center Microsimulation Model (version 0411-2).
Number of AMT Taxpayers (millions). Baseline: 6.1
Proposal: 6.8

* Less than 0.05
** Insufficient data
(1) Calendar year. Baseline is current policy. Proposal would replace mortgage interest deduction with a $15 \%$ non-refundable credit for mortgage interest and limit this credit to the first $\$ 500,000$ of a mortgage on primary residence only. Estimates assume that taxpayers would adjust their investment portfolios and optimally pay down their mortgage balance if their tax benefit from mortgage interest were reduced.
(2) Tax units with negative cash income are excluded from the lowest income class but are included in the totals. For a description of cash income, see http://www.taxpolicycenter.org/TaxModel/income.cfm
(3) Includes both filing and non-filing units but excludes those that are dependents of other tax units.
(4) After-tax income is cash income less: individual income tax net of refundable credits; corporate income tax; payroll taxes (Social Security and Medicare); and estate tax.
(5) Average federal tax (includes individual and corporate income tax, payroll taxes for Social Security and Medicare, and the estate tax) as a percentage of average cash income.

1) Calendar year. Baseline is current policy. Proposal would replace mortgage interest deduction with a $15 \%$ non-refundable credit for mortgage interest and limit this credit to the first $\$ 500,000$
of a mortgage on primary residence only. Estimates assume that taxpayers would adjust their investment portfolios and optimally pay down their mortgage balance if their tax benefit from
mortgage interest were reduced
(2) Tax units with negative cash income are excluded from the lowest income class but are included in the totals. For a description of cash income, see
http://www.taxpolicycenter.org/TaxModel/income.cfm
2) After-tax income is cash income less: individual income tax net of refundable credits; corporate income tax; payroll taxes (Social Security and Medicare); and estate tax.
(5) Average federal tax (includes individual and corporate income tax, payroll taxes for Social Security and Medicare, and the estate tax) as a percentage of average cash income

Note: Elderly tax units are those with either head or spouse (if filing jointly) age 65 or older.
(1) Calendar year. Baseline is current policy. Proposal would replace mortgage interest deduction with a $15 \%$ non-refundable credit for mortgage interest and limit this credit to the first $\$ 500,000$ of a mortgage on primary residence only. Estimates assume that taxpayers would adjust their investment portfolios and optimally pay down their mortgage balance if their ta benefit from mortgage interest were reduced.
(2) Tax units with negative cash in
units with negative cash income are excluded from the lowest income class but are included in the totals. For a description of cash income, see
er.ora/TaxModelincome.cfm
(3) Includes both filing and non-filing units but excludes those that are dependents of other tax units.
(4) After-tax income is cash income less: individual income tax net of refundable credits; corporate income tax; payrol taxes (Social Security and Medicare); and estate tax.
(5) Average federal tax (includes individual and corporate income tax, payroll taxes for Social Security and Medicare, and the estate tax) as a percentage of average cash incom
