Number of AMT Taxpayers (millions). Baseline: 6.1

Proposal: 6.8

^{*} Less than 0.05

^{**} Insufficient data

⁽¹⁾ Calendar year. Baseline is current policy. Proposal would reduce mortgage interest deduction to 15 percent over five years and then completely replace this deduction with a 15% non-refundable credit for mortgage interest. Deduction would be limited to 19 percent for 2015. The option of the credit would be available immediately. Both the credit and the deduction will be limited to the first \$500,000 of a mortgage on primary residence only. Estimates assume that taxpayers would adjust their investment portfolios and optimally pay down their mortgage balance if their tax benefit from mortgage interest were reduced.

⁽²⁾ Tax units with negative cash income are excluded from the lowest income class but are included in the totals. For a description of cash income, see http://www.taxpolicycenter.org/TaxModel/income.cfm

⁽³⁾ Includes both filing and non-filing units but excludes those that are dependents of other tax units.

⁽⁴⁾ After-tax income is cash income less: individual income tax net of refundable credits; corporate income tax; payroll taxes (Social Security and Medicare); and estate tax.

⁽⁵⁾ Average federal tax (includes individual and corporate income tax, payroll taxes for Social Security and Medicare, and the estate tax) as a percentage of average cash income.

⁽¹⁾ Calendar year. Baseline is current policy. Proposal would reduce mortgage interest deduction to 15 percent over five years and then completely replace this deduction with a 15% non-refundable credit for mortgage interest. Deduction would be limited to 19 percent for 2015. The option of the credit would be available immediately. Both the credit and the deduction will be limited to the first \$500,000 of a mortgage on primary residence only. Estimates assume that taxpayers would adjust their investment portfolios and optimally pay down their mortgage balance if their tax benefit from mortgage interest were

⁽²⁾ Tax units with negative cash income are excluded from the lowest income class but are included in the totals. For a description of cash income, see

http://www.taxpolicycenter.org/TaxModel/income.cfm

⁽³⁾ Includes both filing and non-filing units but excludes those that are dependents of other tax units.

⁽⁴⁾ After-tax income is cash income less: individual income tax net of refundable credits; corporate income tax; payroll taxes (Social Security and Medicare); and estate tax.

⁽⁵⁾ Average federal tax (includes individual and corporate income tax, payroll taxes for Social Security and Medicare, and the estate tax) as a percentage of average cash income.
