Proposal: 3.4

* Less than 0.05

** Insufficient data

(1) Calendar year. Baseline is current policy with AMT exemption amounts of \$79,850 for married couples filing a joint return, \$51,150 for others (\$39,925 for married individuals filing separate returns). Proposal would: a) extend a portion of the 33 percent bracket; b) raise the 33 percent rate to 36 percent beginning at a threshold of \$200,000 (single), \$250,000 (married), or \$225,000 (head of household), indexed for inflation after 2009, less the standard deduction and one personal exemption (two if married); c) raise the top tax rate to 39.6 percent; d) reinstate PEP and Pease at thresholds of \$250,000 of AGI (married) and \$200,000 (single), indexed for inflation after 2009; e) tax capital gains and qualified dividends at 20% for taxpayers in the top two brackets; and f) extend the 2009 estate tax law including a \$3.5 million effective exemption (unindexed) and a top estate tax rate of 45 percent. For a description of TPC's current law and current policy baselines, see <http://www.taxpolicycenter.org/T11-0270>

(2) Includes both filing and non-filing units but excludes those that are dependents of other tax units. Tax units with negative cash income are excluded from the lowest income class but are included in the totals. For a description of cash income, see <http://www.taxpolicycenter.org/TaxModel/income.cfm>

(3) The income percentile classes used in this table are based on the income distribution for the entire population and contain an equal number of people, not tax units. The breaks are (in 2012 dollars): 20% \$20,113; 40% \$39,790; 60% \$64,484; 80% \$108,266; 90% \$143,373; 95% \$204,296; 99% \$506,210; 99.9% \$2,655,675.

(4) Includes tax units with a change in federal tax burden of \$10 or more in absolute value.

(5) After-tax income is cash income less: individual income tax net of refundable credits; corporate income tax; payroll taxes (Social Security and Medicare); and estate tax.

(6) Average federal tax (includes individual and corporate income tax, payroll taxes for Social Security and Medicare, and the estate tax) as a percentage of average cash income.

* Less than 0.05

(1) Calendar year. Baseline is current policy with AMT exemption amounts of \$79,850 for married couples filing a joint return, \$51,150 for others (\$39,925 for married individuals filing separate returns). Proposal would: a) extend a portion of the 33 percent bracket; b) raise the 33 percent rate to 36 percent beginning at a threshold of \$200,000 (single), \$250,000 (married), or \$225,000 (head of household), indexed for inflation after 2009, less the standard deduction and one personal exemption (two if married); c) raise the top tax rate to 39.6 percent; d) reinstate PEP and Pease at thresholds of \$250,000 of AGI (married) and \$200,000 (single), indexed for inflation after 2009; e) tax capital gains and qualified dividends at 20% for taxpayers in the top two brackets; and f) extend the 2009 estate tax law including a \$3.5 million effective exemption (unindexed) and a top estate tax rate of 45 percent. For a description of TPC's current law and current policy baselines, see <http://www.taxpolicycenter.org/T11-0270>

(2) Includes both filing and non-filing units but excludes those that are dependents of other tax units. Tax units with negative cash income are excluded from the lowest income class but are included in the totals. For a description of cash income, see <http://www.taxpolicycenter.org/TaxModel/income.cfm>

(3) The income percentile classes used in this table are based on the income distribution for the entire population and contain an equal number of people, not tax units. The incomes used are adjusted for family size by dividing by the square root of the number of people in the tax unit. The resulting percentile breaks are (in 2012 dollars): 20% \$13,941; 40% \$26,136; 60% \$41,226; 80% \$64,003; 90% \$88,398; 95% \$122,605; 99% \$295,996; 99.9% \$1,565,087.

(4) Includes tax units with a change in federal tax burden of \$10 or more in absolute value.

(5) After-tax income is cash income less: individual income tax net of refundable credits; corporate income tax; payroll taxes (Social Security and Medicare); and estate tax.

(6) Average federal tax (includes individual and corporate income tax, payroll taxes for Social Security and Medicare, and the estate tax) as a percentage of average cash income.

Note: Elderly tax units are those with either head or spouse (if filing jointly) age 65 or older.

(1) Calendar year. Baseline is current policy with AMT exemption amounts of \$79,850 for married couples filing a joint return, \$51,150 for others (\$39,925 for married individuals filing separate returns). Proposal would: a) extend a portion of the 33 percent bracket; b) raise the 33 percent rate to 36 percent beginning at a threshold of \$200,000 (single), \$250,000 (married), or \$225,000 (head of household), indexed for inflation after 2009, less the standard deduction and one personal exemption (two if married); c) raise the top tax rate to 39.6 percent; d) reinstate PEP and Pease at thresholds of \$250,000 of AGI (married) and \$200,000 (single), indexed for inflation after 2009; e) tax capital gains and qualified dividends at 20% for taxpayers in the top two brackets; and f) extend the 2009 estate tax law including a \$3.5 million effective exemption (unindexed) and a top estate tax rate of 45 percent. For a description of TPC's current law and current policy baselines, see <http://www.taxpolicycenter.org/T11-0270>

(2) Includes both filing and non-filing units but excludes those that are dependents of other tax units. Tax units with negative cash income are excluded from the lowest income class but are included in the totals. For a description of cash income, see <http://www.taxpolicycenter.org/TaxModel/income.cfm>

(3) The income percentile classes used in this table are based on the income distribution for the entire population and contain an equal number of people, not tax units. The incomes used are adjusted for family size by dividing by the square root of the number of people in the tax unit. The resulting percentile breaks are (in 2012 dollars): 20% \$13,941; 40% \$26,136; 60% \$41,226; 80% \$64,003; 90% \$88,398; 95% \$122,605; 99% \$295,996; 99.9% \$1,565,087.

(4) Includes tax units with a change in federal tax burden of \$10 or more in absolute value.

(5) After-tax income is cash income less: individual income tax net of refundable credits; corporate income tax; payroll taxes (Social Security and Medicare); and estate tax.

(6) Average federal tax (includes individual and corporate income tax, payroll taxes for Social Security and Medicare, and the estate tax) as a percentage of average cash income.
