Number of AMT Taxpayers (millions). Baseline: 4.0

Proposal: 3.3

* Less than 0.05

** Insufficient data

(1) Calendar year. Baseline is current policy. Proposal would a) reinstate the 36 and 39.6 percent tax brackets with the threshold for the 36 percent bracket at \$200,000 (single), \$250,000 (married), or \$225,000 (head of household), indexed for inflation after 2009, less the standard deduction and one personal exemption (two if married); b) set the thresholds for PEP and Pease at \$250,000 of AGI (married) and \$200,000 (single), indexed for inflation after 2009; c) tax capital gains at 20% and qualified dividends at ordinary rates for taxpayers in the top two brackets; and d) extend 2009 estate tax law (\$3.5 million unindexed exemption and a 45 percent rate). For a description of TPC's current law and current policy baselines, see

<http://www.taxpolicycenter.org/T11-0270>

(2) Includes both filing and non-filing units but excludes those that are dependents of other tax units. Tax units with negative cash income are excluded from the lowest income class but are included in the totals. For a description of cash income, see

<http://www.taxpolicycenter.org/TaxModel/income.cfm>

(3) Includes tax units with a change in federal tax burden of \$10 or more in absolute value.

(4) After-tax income is cash income less: individual income tax net of refundable credits; corporate income tax; payroll taxes (Social Security and Medicare); and estate tax.

(5) Average federal tax (includes individual and corporate income tax, payroll taxes for Social Security and Medicare, and the estate tax) as a percentage of average cash income.

(6) Adjusted gross income (AGI) values shown are for married couples filing a joint return (MFJ); the thresholds for single tax units are 80 percent of the MFJ amounts and the thresholds for heads of household are 90 percent of the MFJ amounts. The AGI thresholds are expressed in 2009 dollars.

* Less than 0.05

(1) Calendar year. Baseline is current policy. Proposal would a) reinstate the 36 and 39.6 percent tax brackets with the threshold for the 36 percent bracket at \$200,000 (single), \$250,000 (married), or \$225,000 (head of household), indexed for inflation after 2009, less the standard deduction and one personal exemption (two if married); b) set the thresholds for PEP and Pease at \$250,000 of AGI (married) and \$200,000 (single), indexed for inflation after 2009; c) tax capital gains at 20% and qualified dividends at ordinary rates for taxpayers in the top two brackets; and d) extend 2009 estate tax law (\$3.5 million unindexed exemption and a 45 percent rate). For a description of TPC's current law and current policy baselines, see

<http://www.taxpolicycenter.org/T11-0270>

(2) Includes both filing and non-filing units but excludes those that are dependents of other tax units. Tax units with negative cash income are excluded from the lowest income class but are included in the totals. For a description of cash income, see

<http://www.taxpolicycenter.org/TaxModel/income.cfm>

(3) Includes tax units with a change in federal tax burden of \$10 or more in absolute value.

(4) After-tax income is cash income less: individual income tax net of refundable credits; corporate income tax; payroll taxes (Social Security and Medicare); and estate tax.

(5) Average federal tax (includes individual and corporate income tax, payroll taxes for Social Security and Medicare, and the estate tax) as a percentage of average cash income.
